Notes are not exhaustive and assume that students have completed a course in human physiology and wish to refresh their memory in preparing for an examination. Students are encouraged to refer to a comprehensive textbook or to monographs while using this review. This book is a revised version of a review book used by our medical students for over ten years. Coverage of various topics in physiology is comparable to the percentage of questions on those topics in recent National Board Part I examinations. Review questions follow every few pages of text in order to monitor your understanding of the just preceding material. Multiple choice questions are mainly of the two conventional types: single best answer questions and multiple correct answer questions. Single correct answer questions have lettered alternatives (A to E); multiple correct answer questions have numbered alternatives (1, 2, 3, and 4). The latter questions are answered as follows: Answer A if 1, 2, and 3 are correct; Answer B if 1 and 3 are correct; Answer C if 2 and 4 are correct; Answer D if 4 only is correct; Answer E if all are correct. National Board Examinations also use matching questions and matching with four choices (e.g., Situation 1, Situation 2, Both 1 and 2, Neither 1 or 2). Review questions are numbered consecutively within each of the seven chapters.

A New Approach to ICSE Biology for Class X (A.Y. 2023-24) Onward Dr. K.K. Aggarwal, 2023-05-20. Biology is the study of life and living organisms. Since it embraces all living things, it is perhaps the most fascinating branch of science. The new inventions and discoveries have helped greatly in continuously testing and searching the truth and unfolding the mysteries of life, whether plants, animals, or microscopic life. During the past some years, biology has shifted its focus from the structure of living organisms to looking more at how they work and function. These advances in biological knowledge raise new issues. The present book will help you to understand and contribute to the biological revolution which is taking place in our lives. This book has been revised and upgraded in accordance with the latest syllabus of Biology prescribed by the Council for Indian School Certificate Examinations, New Delhi. The salient features of the book: Written in a very simple, easy-to-understand language and in a pointwise sequential manner. The prescribed syllabus has been strictly followed with special emphasis on easy explanation of concepts with key facts. The text is complemented with well-illustrated, multi-coloured, properly labelled diagrams which inspire the students to draw themselves. Text and illustrations contribute to the basic understanding and appreciation of the field of biology. Different flow charts and tables make the concepts easy to grasp, and the chapters are informative. Some extra useful information has been provided to enhance the students' knowledge related to the chapter. Important points of each chapter, including important biological terms, have been given at the end of each chapter. Comprehensive in-text exercises have been given to check the progress of the students and their retention capacity. At the end of each chapter, an exercise has been given which consists of a variety of questions, including objective type, very short answer type, short answer type, long answer type, and structured questions. Exercises also include questions from past years' Board Examination Papers. Quick revision web charts, Mind Maps containing the gist of each chapter, have been given at the end of each chapter. The ICSE Specimen Question Paper Solved has been given. I hope this book will prove very useful to the students and teachers.
