Human Web William McNeill:

The Human Web John Robert McNeill, William Hardy McNeill, 2003 Why did the first civilizations emerge when and where they did How did Islam become a unifying force in the world of its birth What enabled the West to project its goods and power around the world from the fifteenth century on Why was agriculture invented seven times and the steam engine just once World historical questions such as these the subjects of major works by Jared Diamond David Landes and others are now of great moment as global frictions increase In a spirited and original contribution to this quickening discussion two renowned historians father and son explore the webs that have drawn humans together in patterns of interaction and exchange cooperation and competition since earliest times Whether small or large loose or dense these webs have provided the medium for the movement of ideas goods power and money within and across cultures societies and nations From the thin localized webs that characterized agricultural communities twelve thousand years ago through the denser more interactive metropolitan webs that surrounded ancient Sumer Athens and Timbuktu to the electrified global web that today envelops virtually the entire world in a maelstrom of cooperation and competition J R McNeill and William H McNeill show human webs to be a key component of world history and a revealing framework of analysis Avoiding any determinism environmental or cultural the McNeills give us a synthesizing picture of the big patterns of world history in a rich open ended concise account

Recent Themes in World History and the History of the West Donald A. Yerxa, 2009 New insights on global histories and Western civilization from leading scholars in the field Described as the New York Review of Books for history Historically Speaking has emerged as one of the most distinctive historical publications in recent years actively seeking out contributions from a pantheon of leading voices in historical discourse from both inside and outside academia Recent Themes in World History and the History of the West represents some of the best writing on Western civilization and world history in the past five years This collection of essays and interviews from Historically Speaking gives leading historians approaches to the continually evolving field of world history with a specific emphasis on the relationship of Western civilization to the history of the world The book also discusses the effect of empire on global history and the many ways empire continues to manifest in the contemporary world The contributors discuss world history as an intricate story of the connections within the global community rather than a tidy static narrative that attempts to summarize everything in our global past In this volume the study of world history is presented as a constantly comparative endeavor concerned with the major themes that link and divide humanity

On Justice Mathias Risse, 2020-09-10 Though much attention has been paid to different principles of justice far less has been done reflecting on what the larger concern behind the notion is In this work Mathias Risse proposes that the perennial quest for justice is about ensuring that each individual has an appropriate place in what our uniquely human capacities permit us to build produce and maintain and is appropriately respected for the capacity to hold such a place to begin with Risse begins by investigating the role of political philosophers and exploring how to think

about the global context where philosophical inquiry occurs Next he offers a quasi historical narrative about how the notion of distributive justice identifies a genuinely human concern that arises independently of cultural context and has developed into the one we should adopt now Finally he investigates the core terms of this view including stringency moral value ground and duties of justice

States of Emergency Russ Castronovo, Susan Kay Gillman, 2009 The contributors to this volume argue that for too long inclusiveness has substituted for methodology in American studies scholarship The ten original essays collected here call for a robust comparativism that is attuned theoretically to questions of both

Myths and Realities John Whedbee, 2005 Myths and Realities creates a comprehensive picture of human life and culture while at the same time placing it within the larger cosmic context In recent decades all areas of human knowledge have expanded to an unprecedented degree so the overall context of human existence is at last beginning to emerge In order to present such a wide ranging portrait Myths and Realities looks at history and human nature from several different viewpoints giving special attention to four major topics culture science religion and war Science is a major contributor because it is the most reliable means of acquiring knowledge Religion is part of the wider subject of beliefs in general and these have been given particular consideration because any kind of ideology or belief tends to distort the worldview War has been mankind s constant companion but without its underlying mythology it would lose all glory and romance It would just be senseless savagery Although man has many distinctive qualities one of his most remarkable characteristics is his capacity to believe in all kinds of nonsensical notions In fact the human animal will believe practically anything so long as it makes absolutely no sense at all

On Deep History and the Brain Daniel Lord Smail, 2008 When does history begin What characterizes it This book

Public Sociology Lawrence T. Nichols, 2017-09-29 Public Sociology features a wide ranging discussion of the controversial model of a social science that reaches out to non academic audiences including both average citizens and policymakers This approach has been greeted with enthusiasm by supporters and with skepticism and anxiety among critics Both perspectives are well represented in this volume Some of the critical voices question whether public sociology is even a good idea Others dissent arguing for a strong program in professional sociology as an alternative Still others express concern that public sociology promotes a liberal left political agenda despite its nonpartisan pretensions Some elements of the model are queried such as critical sociology Others are supportive discussing personal experiences the benefits of an engaged social science and how it could take social science into a broader global marketplace Following an introduction by the editor the contributions include David Boyns and Jesse Fletcher Public Relations Disciplinary Identity and the Strong Program in Professional Sociology Jonathan H Turner Is Public Sociology Such a Good Idea Steven Brint Guide to the Perplexed Vincent Jeffries Piritim A Sorokin s Integralism and Public Sociology Norella M Putney Dawn E Alley and Vern L Bengston Social Gerontology as Public Sociology in Action Edna Bonacich Working with the Labor Movement A Personal Journey in Organic Public Sociology Christopher Chase Dunn Global Public Social Science Neil McLaughlin Lisa Kowalchuk and Kerry Turcotte Why Sociology Does Not Need to be Saved Michael Burawoy Third Wave Sociology and the End of Pure Science Patricia Madoo Lengerman and Jill Niebrugge Brantley Back to the Future Settlement Sociology 1885i 1 2 1930 Sean McMahon From the Platform Public Sociology in the Speeches of Edward A Ross Chet Ballard The Origin and Early History of the Association for

Humanist So Interactions Jerry H. Bentley, Renate Bridenthal, Anand A. Yang, 2005-08-31 The essays presented here reflect recent widespread interest in reconsidering the political geographical and cultural boundaries conventionally observed by area specialists and others They intentionally range widely through time and space dealing with diverse issues and contexts but each highlights the very general theme of cross cultural interaction Although they draw heavily on area studies the contributors seek to put previously separate bodies of scholarship in dialogue with one another by exploring those interactions that have historically linked world regions Four general themes are especially prominent in this volume and the essays develop sophisticated positions on each On the issue of agency and structure they offer useful guidance toward recognizing the importance of both human agency and historical structures in historical processes On the theme of states and their roles in cross cultural interactions they acknowledge that states do not entirely control their own destinies but nevertheless deeply influence the development of these exchanges sometimes decisively so Regarding the theme of the global and the local they emphasize the reciprocal influence of global dynamics and local circumstances and agree that analyses must take both into account to be successful Finally all of the essays allow that the theme of cross cultural interaction is crucial to understanding the world and its development through time Contributors C A Bayly Sven Beckert Jerry H Bentley Renate Bridenthal Charles Bright Michael Geyer Alan L Karras Adam McKeown Colin Palmer Stephen H Rapp Jr Caroline Reeves John O Voll Kren Wigen Anand A Yang The European Seaborne Empires Gabriel Paquette, 2019-05-28 An accessible survey of the history of European overseas empires in the seventeenth and eighteenth centuries based on new scholarship In this thematic survey Gabriel Paquette focuses on the evolution of the Spanish Portuguese English French and Dutch overseas empires in the seventeenth and eighteenth centuries He draws on recent advances in the field to examine their development from efficacious forms of governance to coercive violence Beginning with a narrative overview of imperial expansion that incorporates recent critiques of older scholarly approaches Paquette then analyzes the significance of these empires including their political economic and social consequences and legacies He makes the multifaceted history of Europe's globe spanning empires in this crucial period accessible to new readers **History of the Future of Economic Growth** Iris Borowy, Matthias Schmelzer, 2017-02-24 The future of economic growth is one of the decisive questions of the twenty first century Alarmed by declining growth rates in industrialized countries climate change and rising socio economic inequalities among other challenges more and more people demand to look for alternatives beyond growth However so far these current debates about sustainability post growth or degrowth lack a thorough historical perspective This edited volume brings together original contributions on different aspects of the history of economic growth as a central and near ubiquitous tenet of developmental strategies The book addresses the origins and evolution of the growth paradigm from the seventeenth century up to the present day and also looks at sustainable development sustainable growth and degrowth as examples of alternative developmental models By focusing on the mixed legacy of growth both as a
