Hartman, 2019-04-23 Joseph Hartman focuses on the public works campaign of Cuban president and later dictator Gerardo Machado Political histories often condemn Machado as a US puppet dictator overthrown in a labor revolt and popular revolution in 1933 Architectural histories tend to catalogue his regime s public works as derivatives of US and European models Dictator s Dreamscape reassesses the regime s public works program as a highly nuanced visual project embedded in centuries old representations of Cuba alongside wider debates on the nature of art and architecture in general especially in regards to globalization and the spread of US style consumerism The cultural production overseen by Machado gives a fresh and greatly broadened perspective on his regime s accomplishments failures and crimes The book addresses the regime s architectural program as a visual and architectonic response to debates over Cuban national identity US imperialism and Machado s own cult of personality

Mora, Havidán Rodríguez, 2021-09-30 With its 155 mile per hour sustained windspeeds the near Category 5 Hurricane Maria brought catastrophic devastation and destruction as it diagonally crossed the Commonwealth of Puerto Rico from the southeast to the northwest on September 20 2017 The official death toll estimate of 2 975 lost lives means this record storm became one of the most devastating hurricanes not only for Puerto Rico but for the U S Many of these deaths as well as the prolonged human suffering were attributed to what was described as inadequate disaster response and slow restoration of basic services including running water electricity and the provision and distribution of food and medicine and not to the direct impact of the hurricane itself At the same time Hurricane Maria made landfall when Puerto Rico had been confronting a severe economic crisis surging for over a decade This crisis referred to as La Crisis Boricua was characterized by a significant loss of industry and jobs a deteriorating infrastructure record net outmigration a shrinking and rapidly aging population rising healthcare under coverage a bankrupt government and federal legislation restricting fiscal policy decisions made by elected officials on the island Thus Hurricane Maria exacerbated the effects of La Crisis Boricua on the

socioeconomic health and demographic outcomes affecting Puerto Ricans on the island and U S mainland Bringing together scholars from a wide variety of disciplines including economics sociology demography health psychology disaster research political science education the arts and others this volume represents one of the first interdisciplinary sets of studies dedicated to analyzing the effects of Hurricane Maria on island and stateside Puerto Ricans Specific topics cover Hurricane Maria s impact on labor market outcomes including wages and employment by industry health implications including mental health changes in artistic expression civic engagement and disaster response and recovery A common thread through many of the chapters was the destruction of Puerto Rico s electrical grid and the prolonged restoration of electricity and other essential services that resulted in the loss of thousands of lives *Monthly Weather Review* ,1984 *Powerless* Diana Hernández,Jennifer Laird,2025-04-08 Energy serves as the lifeblood of our daily experiences It permeates virtually every aspect of our existence facilitating nourishment safety and productivity When affordability threatens energy s availability a family s living situation can become untenable too cold too hot too dark and too often unhealthy and unsafe In *Powerless* sociologists Diana Hernández and Jennifer Laird reveal the hidden hardship of energy insecurity the inability to adequately meet household energy needs Approximately one in ten households in the U S are energy insecure and four in ten are at risk for energy insecurity These statistics alone do not convey the acute pain of utility shutoffs or the relentless toll of chronic energy hardships marked by difficult choices and harsh living conditions Drawing on survey data and interviews with one hundred energy insecure individuals and families Hernández and Laird detail the experience of energy insecurity Individuals and families suffering from energy insecurity endure economic hardships such as difficulty paying utility bills utility debt and disconnection from utility services They also struggle with physical challenges such as poor housing conditions and poor or dysfunctional heating and cooling systems They are often forced to make difficult choices about what bills to pay These decisions are sometimes referred to as heat or eat choices as families cannot afford to pay for heating and food at the same time Energy insecure individuals and families employ a variety of strategies to keep energy costs down to avoid having to make these hard choices This includes deliberate underconsumption of energy enduring physical discomfort and using dangerous alternatives such as open flames ovens or space heaters to try to maintain a comfortable temperature in their home To be energy insecure is to suffer Despite the heavy toll of energy insecurity most people confront these difficulties behind closed doors believing it is a private matter Thus the enormous social crisis of energy insecurity goes unnoticed Hernández and Laird argue that household energy is a basic human right and detail policies and practices that would expand access to consistent safe clean and affordable energy Their proposals include improving the current energy safety net which is limited and often does not serve the most energy insecure due to stringent program requirements and administrative burdens They also suggest redesigning rates to accommodate income promoting enrollment and expansion of discount programs reforming utility disconnection policies improving energy literacy and ensuring an equitable shift to renewable

energy resources Powerless creates a comprehensive picture of the complex social and environmental issue of energy insecurity and shows how energy equity is not just an aspiration but an achievable reality
