ASSEMBLY

Protective gloves (not provided) should be worn during assembly.

ATTACHING THE OPTIONAL BUMPER SPRING

The optional bumper spring may be used as a pivot when making a cut.

1. Loosen and remove the chain hook ends and the chain breaks from the saw.
2. Attach the bumper spring (optional) with the two screws as illustrated.

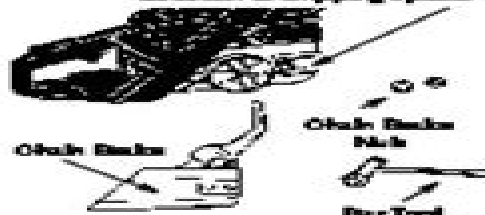

ATTACHING THE BAR & CHAIN (that already attached)

WARNING: If a friend assembled, repeat all steps to ensure your saw is properly assembled before all features are active. Always wear gloves when handling the chain. The chain is sharp and can cut you even when it is not moving!

1. Loosen and remove the chain hook ends and the chain breaks from the saw.
2. Remove the plastic shipping spacer (if present).

Location of shipping spacer

2. An adjusting pin and screw is used to adjust the tension of the chain. It is very important when assembling the bar. Put the pin located on the adjusting screw along the chain bar. Turning the screw will move the adjustment pin up and down the screw. Loosen the adjustment before you

begin inserting the bar onto the saw. See Illustration below.

Adjustment located on Chain Bar

4. Turn the adjusting screw by hand to move the chain up the adjusting pin. Just loosen the gap. This should allow the pin to hammer the correct position. Further adjustment may be necessary as you round the bar.
5. Slide guide bar behind clutch drum until guide bar stops against clutch drum sprocket.

6. Prepare the chain by checking the proper direction. Without turning the bar, it is easy to place the chain on the saw in the wrong direction. Use the illustration of the chain to determine the proper direction.

7. Place the chain over and behind the clutch, filling the drive links in the clutch drum sprocket.
