Woolley, Philip N. Howard, 2019 Social media platforms do not just circulate political ideas they support manipulative disinformation campaigns While some of these disinformation campaigns are carried out directly by individuals most are waged by software commonly known as bots programmed to perform simple repetitive robotic tasks Some social media bots collect and distribute legitimate information while others communicate with and harass people manipulate trending algorithms and inundate systems with spam Campaigns made up of bots fake accounts and trolls can be coordinated by one person or a small group of people to give the illusion of large scale consensus Some political regimes use political bots to silence opponents and to push official state messaging to sway the vote during elections and to defame critics human rights defenders civil society groups and journalists This book argues that such automation and platform manipulation amounts to a new political communications mechanism that Samuel Woolley and Philip N Noward call computational propaganda This differs from older styles of propaganda in that it uses algorithms automation and human curation to purposefully distribute misleading information over social media networks while it

actively learns from and mimicks real people so as to manipulate public opinion across a diverse range of platforms and device networks This book includes cases of computational propaganda from nine countries both democratic and authoritarian and four continents North and South America Europe and Asia covering propaganda efforts over a wide array of social media platforms and usage in different types of political processes elections referenda and during political crises

The Litigation Manual Priscilla Anne Schwab,2007 Innovation is increasingly recognized as a vitally important social and economic phenomenon worthy of serious research study Firms are concerned about their innovation ability particularly relative to their competitors Politicians care about innovation too because of its presumed social and economic impact However to recognize that innovation is desirable is not sufficient What is required is systematic and reliable knowledge about how best to influence innovation and to exploit its effects to the full Gaining such knowledge is the aim of the field of innovation studies which is now at least half a century old Hence it is an opportune time to ask what has been achieved and what we still need to know more about This is what this book sets out to explore Written by a number of central contributors to the field it critically examines the current state of the art and identifies issues that merit greater attention The focus is mainly on how society can derive the greatest benefit from innovation and what needs to be done to achieve this However to learn more about how society can benefit more from innovation one also needs to understand innovation processes in firms and how these interact with broader social institutional and political factors Such issues are therefore also central to the discussion here

provoke nervous laughter and black humor If in the past this snarky folklore may have been shared among friends and uttered behind closed doors today the Internet's ubiquity and instant interactivity propels such humor across a much more extensive and digitally mediated discursive space New media not only let more people in on the joke but they have also become the go to formats for engaging in symbolic interaction especially in times of anxiety or emotional suppression by providing users an expansive forum for humorous combative or intellectual communication including jokes that cross the line of propriety and good taste Moving through engaging case studies of Internet derived humor about momentous disasters in recent American popular culture and history The Last Laugh chronicles how and why new media have become a predominant means of vernacular expression Trevor J Blank argues that computer mediated communication has helped to compensate for users sense of physical detachment in the real world while generating newly meaningful and dynamic opportunities for the creation and dissemination of folklore Drawing together recent developments in new media studies with the analytical tools of folklore studies he makes a strong case for the significance to contemporary folklore of technologically driven trends in folk and mass culture

Acts of Violence in the School Setting Kimberly A. McCabe, 2020-01-08 Since the year 2000 there have been approximately 200 school shootings in the United States Unfortunately this is not simply a U S problem In 2017 a 15 year old Canadian male student committed suicide after shooting two other students and a teacher During that same year in Brazil a private school student fatally shot two classmates and injured four In 2018 a 13 year old Russian girl opened fire with a gas pistol and injured seven 7th graders Hence school violence is a problem of global concern Acts of School Violence in the School Setting addresses this international problem from a crime and criminal justice perspective The history of school violence follows the pattern of what most would consider the history of education According to the U S Department of Justice current research has shown a decline in the rates of school violence over the past three years however the few high profile cases broadcast repeatedly in the media lead the public to other conclusions All individuals agree that a child attending school should be concerned with the process of learning not with avoiding victimization and that the school environment should be a safe and secure location for both students and teachers In addition and most central to this text without a safe school environment students and teachers may be assaulted injured or killed Included in this textbook are definitions related to the types and categories of school violence including bullying stalking and crimes against students that involve the internet discussions on victims and offenders and case examples Also included in this textbook is information on criminal justice system responses to school violence from both a national and international perspective Finally this textbook discusses adult perpetrators of school violence and the explanations for such attacks

The Crime of Aggression Noah Weisbord, 2025-06-17 A gripping behind the scenes account of the dramatic legal fight to hold leaders personally responsible for aggressive war On July 17 2018 starting an unjust war became a prosecutable international crime alongside genocide crimes against humanity and war crimes Instead of collective state responsibility our leaders are now personally subject to indictment for crimes of aggression from invasions and preemptions to drone strikes and cyberattacks The Crime of Aggression is Noah Weisbord's riveting insider's account of the high stakes legal fight to enact this historic legislation and hold politicians accountable for the wars they start Weisbord a key drafter of the law for the International Criminal Court takes readers behind the scenes of one of the most consequential legal dramas in modern international diplomacy Drawing

on in depth interviews and his own invaluable insights he sheds critical light on the motivations of the prosecutors diplomats and military strategists who championed the fledgling prohibition on unjust war and those who tried to sink it He untangles the complex history behind the measure tracing how the crime of aggression was born at the Nuremberg trials only to fall dormant during the Cold War and he draws lessons from such pivotal events as the collapse of the League of Nations the rise of the United Nations September 11 and the war on terror The power to try leaders for unjust war holds untold promise for the international order but also great risk In this incisive and vitally important book Weisbord explains how judges in such cases can balance the imperatives of justice and peace and how the fair prosecution of aggression can humanize modern statecraft
