

Maths at University Interview Questions

Below is a list of questions that have been asked at interviews (mainly at Oxford/Cambridge, but also other universities too).

Sometimes the interviewer will gently ask such things as:

- Tell us about some maths books that you have been reading.
- Why do you want to study maths?
- What areas of maths do you like? (this is a prompt for the next question which will be on that topic!)

Mainly (particularly at Oxford/Cambridge) there is little or no gentle chit chat, and straight into the fun stuff like:

- Which is bigger 2^x or x^2 ?
- Draw $y = A(1 - e^{-Bx})^2$
- Differentiate $y = x^{\sin x}$
- Find an approximation to $1^4 + 2^4 + 3^4 + \dots + 100^4$
- Draw $y = \frac{e^\theta}{1 + e^\theta} \sin \theta$ and $x = \frac{e^\theta}{1 + e^\theta} \cos \theta$
- Draw $y = \cos x^{\cos x}$
- Prove $\frac{a}{b} + \frac{b}{a} \geq 2$
- Draw: $y = e^x$, $y = e^{-x}$, $y = \frac{e^x + e^{-x}}{2}$
- Draw $y = \frac{\sin x}{x}$
- Prove $n^7 - n$ is always divisible by 42.
- $(6 + \sqrt{37})^{20} = 4398704651 \dots \bullet 9999999999 437569 \dots$
Can you show why this number is so close to an integer?
- On a plane each individual point can be either red, white or blue. Prove that at some point on the plane two points will be at a distance of one unit apart and the same colour.

Bahamian Students' Experiences with Mathematics in American Universities and Colleges Nikki Rochelle Cleare, 2011 This longitudinal qualitative multi case study examines the mathematical experiences of three Bahamian students pursuing science degrees in American universities and its relationship to their previous mathematical experiences in their Bahamian high schools Drawing on cultural psychology and sociocultural theories of learning this study found that the relationship between the academic preparedness of the participants on their experiences with collegiate mathematics is not limited to subject content only The lessons learnt from the implied curriculum also play a role in their experiences with collegiate mathematics Of the three participants two have had to learn develop techniques for studying because they had not been sufficiently challenged in their previous environments to do so Each of the cases also highlights some powerful constructs needed for success in mathematics and at least two emphasize making connections between concepts procedures manipulatives tools and multiple approaches when solving problems This study contributes to an emerging area of research on student persistence in college level mathematics courses as well as to the ongoing discussions in mathematics education regarding the role importance of conceptual understanding and how to promote it The study makes visible some of the ways in which students post secondary experiences with mathematics are shaped by their perception of their mathematical preparation thus providing a basis for discussions of possible curricular change in the Bahamas It also suggests that issues such as confidence and school teacher expectations of students may play a role in the development of conceptual understanding **Psychological Studies in the Teaching, Learning and Assessment of Mathematics** Yiming

Moschkovich, Marta Civil, 2011-05-01 This book that explores the mathematics education of Latinos as in 13 original research studies Each chapter represents research that grounds mathematics instruction for Latinos as in the resources to be found in culture and language By inverting the deficit perspective this volume redresses the shortcomings found in the previous literature on Latino a learners Each study frames language e g bilingualism not as an obstacle to learning but as a resource for mathematical reasoning Other chapters explore the notion of cultural variation not as a liability but as a tool for educators to build upon in the teaching of mathematics Specifically the book reframes culture as a focus on the practices objects inscriptions or people that connect mathematical concepts to student thinking and experiences both in and out of school The book s four sections divide the research The first section of the book focuses on mathematic learning in classrooms specifically exploring bilingual Latino a students the second section explores Latino a learners in communities including the role parents can play in advancing learning the third section includes chapters focused on teacher professional growth the final section concerns the assessment and mis assessment of Latino a learners The research shared in this volume provides ample evidence that mathematics educators who choose to ignore language or culture in their pedagogy risk shortchanging their Latino a students
