Structural Analysis in Microelectronic and Fiber-Optic Systems Ephraim Suhir, 2012-12-06 This book contains the fundamentals of a discipline which could be called Structural Analysis in Microelectronics and Fiber Optics. It deals with the mechanical behavior of microelectronic and fiber optic systems and is written in response to the crucial need for a textbook for a first-in-depth course on mechanical problems in microelectronics and fiber optics. The emphasis of this book is on electronic and optical packaging problems and analytical modeling. This book is apparently the first attempt to select, advance, and present those methods of classical structural mechanics which have been or can be applied in various stress-strain problems encountered in high technology engineering and some related areas such as materials science and solid state physics. The following major objectives are pursued in Structural Analysis in Microelectronic and Fiber Optic Systems: Identify structural elements typical for microelectronic and fiber optic systems and devices and introduce the student to the basic concepts of the mechanical behavior of microelectronic and fiber optic structures subjected to thermally induced or external loading. Select, advance, and present methods for analyzing stresses and deflections developed in microelectronic and fiber optic structures. Demonstrate the effectiveness of the methods and approaches of the classical structural analysis in the diverse mechanical problems of microelectronics and fiber optics and give students of engineering as well as practicing engineers and designers a thorough understanding of the main principles involved in the analytical evaluation of the mechanical behavior of microelectronic and fiber optic systems.

Microelectronic Systems Albert Heuberger, Günter Elst, Randolph Hanke, 2011-12-26 This book is dedicated to Prof. Dr. Heinz Gerhuser on the occasion of his retirement, both from the position of Executive Director of the Fraunhofer Institute for Integrated Circuits IIS and from the Endowed Chair of Information Technologies with a Focus on Communication Electronics LIKE at the Friedrich-Alexander-Universität Erlangen-Nürnberg. Heinz Gerhuser's vision and entrepreneurial spirit have made the Fraunhofer IIS one of the most successful and

renowned German research institutions He has been Director of the Fraunhofer IIS since 1993 and under his leadership it has grown to become the largest of Germany's 60 Fraunhofer Institutes a position it retains to this day currently employing over 730 staff Likely his most important scientific as well as application related contribution was his pivotal role in the development of the mp3 format which would later become a worldwide success The contributions to this Festschrift were written by both Fraunhofer IIS staff and external project team members in appreciation of Prof Dr Gerh user's lifetime academic achievements and his inspiring leadership at the Fraunhofer IIS The papers reflect the broad spectrum of the institute's research activities and are grouped into sections on circuits information systems visual computing and audio and multimedia They provide academic and industrial researchers in fields like signal processing sensor networks microelectronics and integrated circuits with an up to date overview of research results that have a huge potential for cutting edge industrial applications

Microelectronics Education Adrian M. Ionescu, Michel Declercq, Maher Kayal, Yusuf Leblebici, 2013-03-19 In this book key contributions on developments and challenges in research and education on microelectronics microsystems and related areas are published Topics of interest include but are not limited to emerging fields in design and technology new concepts in teaching multimedia in microelectronics industrial roadmaps and microelectronic education curricula nanoelectronics teaching long distance education The book is intended for academic education level and targets professors researchers and PhDs involved in microelectronics and or more generally in electrical engineering microsystems and material sciences The 2004 edition of European Workshop on Microelectronics Education EWME is particularly focused on the interface between microelectronics and bio medical sciences
