17

I once had a professor tell a class that he sifted through our pile of essays, glancing at the titles and introductions, looking for something that grabbed his attention. Everything else went to the bottom of the pile to be read last, when he was tired and probably grumpy from all the marking. Don't get put at the bottom of the pile, he said.

17.1 What is the Importance of an Introduction?

An Introduction to a scientific paper familiarizes the reader with the background of the issue at hand. It must reflect why the issue is topical and its current importance in the vast sea of research being done globally. It lays the foundation of biomedical writing and is the first portion of an article according to the IMRAD pattern (Introduction, Methodology, Results, and Discussion) [1].

It provides the flavour of the article and many authors have used phrases to describe it for example—'like a gate of the city' [2], 'the beginning is half of the whole' [3], 'an introduction is not just wrestling with words to fit the facts, but it also strongly modulated by perception of the anticipated reactions of peer colleagues', [4] and 'an introduction is like the trailer to a movie'. A good introduction helps captivate the reader early.
