Paul Williams, 2013-01-18 The 5th edition of Model Building in Mathematical Programming discusses the general principles of model building in mathematical programming and demonstrates how they can be applied by using several simplified but practical problems from widely different contexts Suggested formulations and solutions are given together with some computational experience to give the reader a feel for the computational difficulty of solving that particular type of model Furthermore this book illustrates the scope and limitations of mathematical programming and shows how it can be applied

toreal situations By emphasizing the importance of the building andinterpreting of models rather than the solution process the authorattempts to fill a gap left by the many works which concentrate onthe algorithmic side of the subject In this article H P Williams explains his originalmotivation and objectives in writing the book how it has beenmodified and updated over the years what is new in this editionand why it has maintained its relevance and popularity over theyears ahref http www statisticsviews com details feature 4566481 Model Building in Mathematical Programming published in fifth edition htmlhttp www statisticsviews com details feature 4566481 Model Building in Mathematical Programming published in fifth edition html a **Businesss Horizons Volume XI,Number 1,February,1968** Indiana University,Graduate School of Business,1968
