

Chapter 1

Managerial Accounting and the Business Environment

Solutions to Questions

1-1 In contrast to financial accounting, managerial accounting: (1) focuses on the needs of managers rather than outsiders; (2) emphasizes decisions affecting the future rather than the financial consequences of past actions; (3) emphasizes relevance rather than objectivity and verifiability; (4) emphasizes timeliness rather than precision; (5) emphasizes the segments of an organization rather than summary data concerning the entire organization; (6) is not governed by GAAP; and (7) is not mandatory.

1-2 A business plan is typically prepared by new businesses and contains information about the company's basic product or service and about the plans for getting it to market (i.e., the customers). Details will included in the plan will include the production method, the marketing plan and the financial resources needed. Key users are the potential providers of financial resources for the business – lenders and investors.

1-3 Customer value propositions fall into three broad categories—customer intimacy, operational excellence, and product leadership. A company with a customer intimacy strategy attempts to better understand and respond to its customers' individual needs than its competitors. A company that adopts an operational excellence strategy attempts to deliver products faster, more conveniently, and at a lower price than its competitors. A company that has a product leadership strategy attempts to offer higher quality products than its competitors.

1-4 Managers carry out three major activities in an organization: planning, directing and motivating, and controlling. Planning involves establishing a basic strategy, selecting a course of action, and specifying how the action will be

implemented. Directing and motivating involves mobilizing people to carry out plans and run routine operations. Controlling involves ensuring that the plan is actually carried out and is appropriately modified as circumstances change.

1-5 The Planning and Control Cycle involves formulating plans, implementing plans, measuring performance, and evaluating differences between planned and actual performance.

1-6 The controller is responsible for many of the technical aspects of the accounting and finance functions in an organization. The controller also often works with other managers and provides consulting and business analysis services. Controllers are often key members of cross-functional teams involved in a variety of activities including developing budgets, analyzing project proposals and targeting processes for improvement.

1-7 A person in a line position is directly involved in achieving the basic objectives of the organization. A person in a staff position provides services and assistance to other parts of the organization, but is not directly involved in achieving the basic objectives of the organization.

1-8 Decentralization involves the delegation of decision-making throughout an organization by giving managers at different operating levels the authority to make decisions related to their areas of responsibility.

1-9 The three main categories of inventories in a manufacturing company are raw materials, work in process, and finished goods.

Charles E. Menifield, 2017-08-02 Menifield's budgeting and finance book firmly connects budgetary theory and practice. It provides instructors a standalone book that covers all of the major thematic areas expected of a book of this type.

Canadiana, 1989-06 **Managing Sustainable Stakeholder Relationships** Linda O'Riordan, 2017-09-01 This book examines corporate approaches to responsible management by investigating the stakeholder relationships between business and society. Though concepts of responsible management continue to evolve, its key objective is to explore the opportunities and dilemmas which business decision makers face when attempting to reconcile their organisation's interests with those of other stakeholder groups. In this intensely debated field, it focuses on the power of entrepreneurial purpose and the opportunities which emerge when corporate choices and actions are driven by connected stakeholder interests. A case study of the pharmaceutical industry in the UK and Germany is presented to reveal how decision makers in this particular sector are responding to their context-specific management challenges. The research findings are subsequently employed to examine and revise a pre-specified stakeholder management framework which was previously developed by the author. The proposed updated framework is the book's main conceptual contribution. By depicting a set of inclusive, integrated and inter-related steps, it is intended to provide an innovative, comprehensive practical toolkit for stakeholder management. As such, it is designed to help decision makers to attain the greatest possible outcome from the resources they invest by consciously basing their choices not merely on the impacts for their shareholders but also, and more holistically, for a broader range of stakeholders. Ultimately, the book demonstrates how optimally harmonised stakeholder management can serve as a powerful catalyst for unlocking viable business opportunities which serve the interests of business and society. *Bankruptcy and Insolvency Accounting, Volume 1* Grant W. Newton, 2009-12-02 Accountants and financial managers are often the first professionals to realize that a financial problem exists within a corporation but must be familiar with the various alternatives available to clients before they can offer solutions. Completely updated *Bankruptcy and Insolvency Accounting* Seventh Edition Volume 1 provides detailed information on SOP 90-7 and FASB statements 141, 142 and 144 and revisions made in CSSR 93-1 by CSSR 03-1. The process of corporate restructuring is thoroughly described for controllers, CEOs, CFOs and CPAs with small businesses as clients. *Tercentenary History of Maryland* Matthew Page Andrews, 1925 E-Government Kelvin J. Bwalya, Stephen M. Mutula, 2014-09-12 E-Government is a hot topic. The integration of Information and Communication Technologies into public service delivery worldwide offers a number of promising opportunities. This text refers in particular to the benefits derived from ubiquitous access to and delivery of government services to citizens, business partners and employees. This book analyses the fundamental technical and non-technical concepts that are essential for successful implementation of e-Government in diverse environments, especially in developing countries. This book is an indispensable resource for both e-Government practitioners and researchers in that it brings to the fore scholarly scrutiny, scientific debate and best practice in e-Government. The author has a background in computer and information science and

accentuates the multi disciplinary nature of the issues surrounding e Government
