Sarin,2012-12-06 In the fall of 1992 a conference honoring Elwood S Buffa was held at the Anderson Graduate School of Management of the University of California Los Angeles This book is a collection of the work presented at that conference The scholars who gathered to honor El are the prominent researchers in the field of Operations Management Their collective work published in this book represents the

richness of the field and provides the reader with valuable insights into its important issues and problems. While any grouping of the articles by these distinguished scholars will be arbitrary, I have organized the book in four sections. In the first section, the articles dealing with the strategic issues in Operations Management are compiled. The articles deal with continuous improvement, quality services, supply chain management, and creating value through operations. The articles that explore the interface of Operations Management with other functional areas, e.g., engineering and marketing, are grouped in the second section. The third section of the book contains articles that attempt to model some important planning problems that arise in the management of production and operations. Some of the papers in this section provide state-of-the-art reviews of selected topic areas. Finally, the fourth section contains articles that deal with future directions for Operations Management. The authors offer several insights into the future evolution of the field. The book begins with the keynote address given by El Buffa at the start of the conference on November 2, 1991.

**Emerging Trends in the Development and Application of Composite Indicators** Jeremic, Veljko, Radojicic, Zoran, Dobrota, Marina, 2016-09-12. Perceiving complex multidimensional problems has proven to be a difficult task for people to overcome. However, introducing composite indicators into such problems allows the opportunity to reduce the problem's complexity. *Emerging Trends in the Development and Application of Composite Indicators* is an authoritative reference source for the latest scholarly research on the benefits and challenges presented by building composite indicators and how these techniques promote optimized critical thinking. Highlighting various indicator types and quantitative methods, this book is ideally designed for developers, researchers, public officials, and upper-level students.
