The Construction Industry in the Fourth Industrial Revolution Clinton Aigbavboa, Wellington Thwala, 2019-08-09 This book gathers papers from the 11th Construction Industry Development Board cidb Postgraduate Research Conference held on 28-30 July 2019 in Johannesburg South Africa. The conference provided an essential forum for reviewing and generating knowledge on Construction 4.0 and consequently highlighted processes and practices that allow us to deliver and operate built environment assets more effectively and efficiently by focusing on physical to digital and digital to physical transformation. The event addressed three broad themes: Industrial production, prefabrication, 3D printing and assembly offsite; and advanced manufacturing. Cyber-physical systems, actuators, sensors, IoT, robots and cobots for repetitive and dangerous tasks; and drones for mapping, progress monitoring, safety and quality inspections, lifting, moving and positioning. Technologies: digital ecosystems, digital platforms, BIM, video and laser scanning, AI and cloud computing, big data and data analytics, reality capture, blockchain, simulation, virtual and augmented reality, data standards and interoperability and vertical and horizontal integration. Given its scope, the book will be of interest to all construction industry and architectural professionals who want to learn about cutting edge technologies applied to construction.

Managing Diversity and Equality in Construction Andrew W. Gale, Marilyn J. Davidson, 2006-07-28 With women in the UK construction industry constituting just thirteen per cent of the workforce and black and Asian workers numbering less than two per cent despite representing more than six per cent of the working population, diversity is a problem that the construction industry needs to tackle directly. In this title, diversity management is presented as an opportunity for the construction industry. Work is presented from several different countries and regions in North America, Australia and Europe to provide a comprehensive picture of this complex and often sensitive issue. Going beyond the traditional topics of gender and racial discrimination, contributions encompass a wide range of diversity issues facing the construction industry, including sexual orientation, disability and the work-life balance. Essential reading for construction managers and a valuable resource for postgraduate researchers, this key title provides not only a thorough exposition of contemporary research but also supplies the practical diagnostic tools and techniques to successfully manage diversity in construction and the information to adhere to the law.

Occupational Health and Safety in Construction Project Management Helen Lingard, 2005 This book addresses an increasingly important area in the construction industry. Case studies are used extensively to illustrate important points and refer to current successful safety management techniques.

“Rafiq M. Choudhry, Jimmie W. Hinze, 2006 CIB W99 75 *Construction Workforce Management in the Fourth Industrial Revolution Era* Lerato Aghimien, Clinton Ohis Aigbavboa, Douglas Aghimien, 2024-02-12 Through a critical review of existing related theories and models the authors address gaps in existing workforce management studies and propose a conceptual model to improve the management of workers in the construction industry *Corporate Social Responsibility in the Construction Industry* Michael Murray, Andrew Dainty, 2013-01-11 The construction process right through from planning and design to use and demolition has a major impact on society Traditionally concern has been focused on its environmental impact and the quest for sustainability but this has now extended into the wider remit of Corporate Social Responsibility CSR Essentially this means that businesses must act voluntarily in a socially ethical manner by developing a policy that encompasses the core principles enshrined by CSR A unique presentation on a topic of emerging importance Corporate Social Responsibility in the Construction Industry is essential reading for all built environment undergraduate and post graduate courses as well as CEOs and senior managers within construction businesses who may be about to embark on developing a CSR strategy **Human Resource Management in Construction** Andrew Dainty, Martin Loosemore, 2013-05-07 The construction sector is one of the most complex and problematic arenas within which to manage people As a result the applicability of much mainstream human resource management HRM theory to this industry is limited Indeed the operational realities faced by construction organizations mean that all too often the needs of employees are subjugated by performance concerns This has potentially dire consequences for those who work in the industry for the firms that employ them and ultimately for the prosperity and productivity of the industry as a whole In this new edition of their leading text Andrew Dainty and Martin Loosemore have assembled a collection of perspectives which critically examine key

aspects of the HRM function in the context of contemporary construction organizations Rather than simply update the previous edition the aim of this second edition is to provide a more critical commentary on the ways in which the industry addresses the HRM function and how this affects those who work within the industry To this end the editors have gathered contributions from many of the leading thinkers within construction HRM to critique the perspectives presented in the first edition Each contributor either tackles specific aspects of the HRM function or provides a critical commentary on industry practice The authors explain using real life case studies the ways in which construction firms respond to the myriad pressures that they face through their HRM practices Together the contributions encourage the reader to rethink the HRM function and its role in defining the employment relationship This provides essential reading for students of construction and project management and reflective practitioners who are interested in theoretically informed insights into industry practice and its implications
