Pardalos, Henry Wolkowicz, 1998 This volume presents refereed papers presented at the workshop Semidefinite Programming and Interior Point Approaches for Combinatorial Problems held at The Fields Institute in May 1996 Semidefinite programming SDP is a generalization of linear programming LP in that the non negativity constraints on the variables is replaced by a positive semidefinite constraint on matrix variables Many of the elegant theoretical properties and powerful solution techniques follow through from LP to SDP In particular the primal dual interior point methods which are currently so successful for LP can be used to efficiently solve SDP problems In addition to the theoretical and algorithmic questions SDP has found many important applications in combinatorial optimization control theory and other areas of mathematical programming The papers in this volume cover a wide spectrum of recent developments in SDP The volume would be suitable as a textbook for advanced courses in optimization It is intended for graduate students and researchers in mathematics computer science engineering and operations      Buildings Energy Conservation ,1986      **Resources in Education** ,1980      **The Puzzle of Vehicle Selection in Conceptual Metonymies** Hubert Kowalewski, 2023-12-14 When you use a metonymy to say I've got a new set of wheels why do you refer to a car by means of the wheels rather than any other part Most cognitive linguists would agree that we prefer to talk about parts that are somehow salient yet the seemingly simple notion of salience is entangled in a number of intricate problems related to how we understand and talk about the surrounding reality Adopting the theoretic framework of Ronald Langacker's Cognitive Grammar this volume studies deep and general cognitive factors governing salience effects that influence the ways we use conceptual metonymies in phonic and sign languages      *Aeroform* James Jones, Demetri Telionis, 2022-09-28 *Aeroform* Designing for Wind and Air Movement provides a comprehensive introduction to applying aerodynamic principles to architectural design It presents a challenge to architects and architectural engineers to give shape to the wind and express its influence on architectural form The wind pushes and pulls on our buildings infiltrates and exfiltrates through cracks and openings and lifts roofs during storm events It can also offer opportunities for resource conservation through natural ventilation or a biophilic connection between indoors and out This book provides basic concepts in fluid mechanics such as materials forces equilibrium pressure and hydrostatics introduces the reader to the concept of airflow and provides strategies for designing for wind resistance especially in preventing uplift Natural ventilation and forced airflow are explored using examples such as Thomas Herzog's Hall 26 in Hanover RWE Ag building in Essen Germany and the Kimbell Art

Siegelbaum,2011-08-15 The automobile and Soviet communism made an odd couple The quintessential symbol of American economic might and consumerism never achieved iconic status as an engine of Communist progress in part because it posed an awkward challenge to some basic assumptions of Soviet ideology and practice In this rich and often witty book Lewis H Siegelbaum recounts the life of the Soviet automobile and in the process gives us a fresh perspective on the history and fate of the USSR itself Based on sources ranging from official state archives to cartoons car enthusiast magazines and popular films Cars for Comrades takes us from the construction of the huge Soviet Detroit's emblems of the utopian phase of Soviet planning to present day Togliatti where the fate of Russia's last auto plant hangs in the balance The large role played by American businessmen and engineers in the checkered history of Soviet automobile manufacture is one of the book's surprises and the author points up the ironic parallels between the Soviet story and the decline of the American Detroit In the interwar years automobile clubs car magazines and the popularity of rally races were signs of a nascent Soviet car culture its growth slowed by the policies of the Stalinist state and by Russia's intractable roadlessness In the postwar years cars appeared with greater frequency in songs movies novels and in propaganda that promised to do better than car crazy America Ultimately Siegelbaum shows the automobile epitomized and exacerbated the contradictions between what Soviet communism encouraged and what it provided To need a car was a mark of support for industrial goals to want a car for its own sake was something else entirely Because Soviet cars were both hard to get and chronically unreliable and such items as gasoline and spare parts so scarce owning and maintaining them enmeshed citizens in networks of private semi illegal and ideologically heterodox practices that the state was helpless to combat Deeply researched and engagingly told this masterful and entertaining biography of the Soviet automobile provides a new perspective on one of the twentieth century's most iconic and important technologies and a novel approach to understanding the history of the Soviet Union itself      **Spring Meeting** American Geophysical Union.
