Manual Do Focus 2002:

Handbook of Evidence-Based Treatment Manuals for Children and Adolescents Craig Winston LeCroy, 2008-04-18

With the advance of evidence based practice has come the publication of numerous dense volumes reviewing the theoretical and empirical components of child and adolescent treatment. There are also a variety of detailed treatment manuals that describe the step by step procedures to guide ongoing research and practice. The second edition of Craig Winston LeCroy's Handbook of Evidence Based Child and Adolescent Treatment Manuals is a forceful combination of the two approaches as he gathers fifteen varied treatment manuals and brief summaries of the research supporting each to ensure that practitioners will truly understand how to implement the treatments they are using. A completely revised and expanded edition of the handbook's first edition, this is an essential guide to some of the best programs for helping children and teens. Each chapter begins with an explanatory section that discusses the theoretical and empirical underpinnings of the programs. The treatment manual follows, leading readers through sessions with specific details about conducting the treatment that have been refined and improved through extensive testing and research. Organized into three sections: the major clinical disorders, social problems confronting children and teens, and preventive interventions, the Handbook brings together some of the most esteemed researcher/practitioners in the child and adolescent field. The book presents an impressive variety of innovative treatment programs and techniques, including the SiHLE program intended to prevent problems confronting children and teens and preventive interventions. The Handbook brings together some of the most esteemed researcher/practitioners in the child and adolescent field. The book presents an impressive variety of innovative treatment programs and techniques, including the SiHLE program intended to prevent HIV through education and self-esteem building, the Children of Divorce Intervention Program, a therapy for younger children stressing resilience and skill building, and Strengths Oriented Family Therapy, which reaches out to substance involved adolescents and their families. The Handbook of Evidence Based Child and Adolescent Treatment Manuals is an indispensable reference for researchers, graduate students, and practitioners working with children and adolescents in a multitude of settings, from schools and juvenile correction centers to group homes and family service agencies.

Advanced Methods in Family Therapy Research Richard B. Miller, Lee N. Johnson, 2013-12-17

Research is vital in moving the field of family therapy forward, but the myriad of possibilities inherent in working with systems and individuals can overwhelm even the most seasoned researcher. *Advanced Methods in Family Therapy Research* is the best resource to address the day to day questions that researchers have as they investigate couples and families and the best source for learning long term theory and methodology. The contributors of this volume share their wisdom on a wide variety of topics, including validity concerns, measuring interpersonal process and relational change, dyadic data analysis, demonstrated through a sample research study, mixed methods studies, and recruitment and retention. The volume contains one of the most detailed descriptions of data collections and covers interviewing using questionnaires and

observing brain activity Also addressed are suggestions to meaningfully reduce cultural bias to conduct ethical research and in the Health Services Research chapter to examine interventions for clients in various income brackets A separate ground breaking chapter also addresses psychophysiological research in a couple and family therapeutic context As an added benefit readers will learn how to become informed consumers of journal articles and studies how to produce quality publishable research and how to write fundable grant proposals Each chapter provides a clear and detailed guide for students researchers and professionals and as a whole Advanced Methods in Family Therapy Research advances the field by teaching readers how to provide evidence that marriage and family therapy not only relieves symptoms but also effects behavioral change in all family members

What is Mental Retardation? Harvey N. Switzky, Stephen Greenspan, 2006 What is Mental Retardation is a rare peek into the divergent and at times contentious points of view among the world's leading researchers on what the condition of mental retardation is and how it should be defined measured and implemented in the 21st century This candid and insightful collection of 21 essays features expert opinion on issues ranging from whether mental retardation really is a slowing of mental development and what the disability should be called to how cultural norms affect the definition of the condition worldwide and lessons learned from the Atkins v Virginia case The definitions of mental retardation published from 1921-2002 by the American Association on Intellectual and Developmental Disabilities provide the backdrop for this powerful discussion
