

# **CHAPTER 1**

## **BACKGROUND OF THE STUDY**

Artificial Intelligence (AI) is a popular technology that promises to revolutionize the way we work, play, and live. It has enabled us to quickly process large amounts of data and has changed our daily lives, our homes, and our interactions with others. AI is doing a lot of good and will continue to provide many benefits for our modern world, as AI could be used to end wars or eradicate diseases, however, AI can have negative consequences, such as create autonomous killing machines, increase unemployment or facilitate terrorist attacks. Legendary physicist Stephen Hawking shared this ominous warning: "Success in creating effective AI could be the biggest event in the history of our civilization. Or the worst. So, we cannot know if we will be infinitely helped by AI or ignored by it and sidelined, or conceivably destroyed by it." To prepare for the negative impacts of AI, we must consider what some of its negative impacts might be, which may become an imminent reality.

## **STATEMENT OF THE PROBLEM**

The main goal of this research is to find out the negative impacts of Artificial Intelligence on the lives of Grade 11 TVL Information and Communication Technology of Mangaldan National High School.

Concretely, the objective of this study is to give answers the following questions:

1. What are the negative effects of Artificial Intelligence?
2. How does it affect the future of every TVL-ICT student?
3. What are the ways to prevent the misuse of Artificial Intelligence?

## **SCOPE AND DELIMITATION**

AI is a debatable topic and is often represented in a negative way, some would call it a blessing in disguise for businesses, while for some it is a technology that endangers the mere existence of humankind as it is potentially capable of taking over and dominating human being, but in reality artificial intelligence has affected our lifestyle either directly or indirectly and shaping the future of tomorrow. AI has already become an intrinsic part of our daily life and has greatly impacted our lifestyle despite the imperative uses of digital assistants of mobile phones, driver-assistance systems, the bots, texts and speech translators, and systems that assist in recommending products and services and customized learning. The researcher will have 10 participants approximately out of 90 Grade 11 TVL-ICT students of MNHS.

## **CONCEPTUAL FRAMEWORK**

Artificial Intelligence (AI) has become a part of our daily lives. Its propensity to affect human rights is getting more severe gradually. Some consequences of interference of AI with human rights have already been experienced. However, with rapid advancement of AI-technology, these consequential adverse impacts due to intersection of AI and human rights are apprehended to grow in severity as well as in dimension.

*The Wonder of the Human Hand* E. F. Shaw Wilgis, 2014-11-01 Specialists from a world class hand center remind us how very important hands are and describe how medicine helps people whose hands are impaired Using our hands we interact with the environment in ways that are more sophisticated more varied and more productive than any other part of our body The delicate instrument that is the hand makes it possible for us to knead dough and perform a heart transplant make contact with strangers friends and lovers throw a baseball and create a scale model of a skyscraper and build that skyscraper From the most mundane activity to our most sublime achievement the hand has helped us shape the world and given us a deeper understanding of our place in it In *The Wonder of the Human Hand* surgeons and hand specialists from the world renowned Curtis National Hand Center describe how the hand is used in work sports and music and trace the human fascination with hands in religion and art They relate awe inspiring stories of people throughout history including major league pitcher Jim Abbott orthopedic surgeon Dr Liebe Diamond and pianist Leon Fleisher who accomplished great things with one hand or with impaired or injured hands and they tell of marvelous surgeries that create fingers where none exist Recounting how the hand interprets the environment and returns tactile information to the brain the book underscores the importance of the hand to people who cannot see or hear Throughout the authors explore how medical science restores bones tendons nerves muscles and blood vessels in hands injured through disease accident and combat ever aware of how the form and function of the human hand combine harmoniously in everyday activities and Herculean efforts alike

**Blood Substitutes** Robert M. Winslow, Kim D. Vandegriff, Marcos Intaglietta, 2012-12-06 This book is not a proceedings volume Rather the chapters are essays by experts in the field of blood substitutes invited by the editors to contribute to the 1996 Current Issues in Blood Substitutes Research and Development course given in San Diego March 18-21 The contributors were selected because of their expertise in areas deemed by the editors to be critical to the advancement of the field The course as in past years is heavily influenced by feedback from participants and by research in this and related fields In addition to the didactic lectures for which these chapters are the foundation the course also offers the opportunity for presentation of research reports progress reports from the various companies currently commercializing products and round table discussions of selected subjects Thus we are grateful to past participants for their helpful comments Production of a book especially on a short timeline is not an easy feat

*Lying, Cheating, and Carrying On* Salman Akhtar, Henri Parens, 2009-02-12 What constitutes a lie What are the different types of lies Why do people lie Is dishonesty ubiquitous in human experience And what should be done with individuals who seek psychotherapeutic help and yet can not reveal important aspects of their lives and even fabricate histories associations and dreams Such questions form

the backbone of this exceptional book Starting with the emergence of the capacity to lie in childhood and the formative influence of the family in children s moral development the discourse goes on to include the variety of adulthood lies including social lies existential lies pathological lies narcissistic lies and sociopathic lies Contributions from distinguished psychoanalysts like Salman Akhtar Harold Blum Ruth Fischer Lucy LaFarge Henri Parens and Michael Stone along with others explore the impact of dishonesty on the internal and external realities of an individual Malignant forms of lies involving serious character pathology and criminality as well as their detection are also discussed The book s aim is to help therapists enhance their empathy with patients who are compelled to lie and to provide them with better therapeutic strategies to deal with the clinical dilemmas that arise in working with such children and adults     *A Family's Guide to Tourette Syndrome* John T.
