

## Multiminor Mark 4

The Mark 4 version of the highly successful Avo Multiminor is again a pocket-size a.c./d.c. moving-coil, multi-range test meter, but with improved design and many new features.

The internal circuitry of the Multiminor incorporates many of the latest techniques, including printed circuit resistors. Pancratic construction is now incorporated as standard. The scaleplate has been completely redesigned for ease and speed of reading. Two basic scales are provided each approximately 2.75 inches (6.98 cm) in length. The inner scale is for resistance measurements only, and the outer scale is for a.c./d.c. voltage and d.c. current. This scale has 50 divisions, which are calibrated 0-25 and 0-100. Range selection is effected by means of a simple rotary switch, there being only two sockets for any measurement.

The functional moulded panel of the Multiminor is in light grey, with very legible black lettering. The instrument is supplied in an attractive black plastic carrying case, complete with a pair of leads and inter-changeable test probes and clips. It is also packed in a two-colour outer presentation carton.
