Congress. House. Committee on Appropriations. Subcommittee on Transportation, Housing and Urban Development, and Related Agencies,2009 Buying the Big Jets Paul Clark,2017-07-14 Selecting the right aircraft for an airline operation is a vastly complex process involving a multitude of skills and considerable knowledge of the business Buying the Big Jets has been published since 2001 to provide expert guidance to all those involved in aircraft selection strategies This third edition brings the picture fully up to date representing the latest developments in aircraft products and best practice in airline fleet planning techniques It features a new section that addresses the passenger experience and for the first time includes regional jet manufacturers who are now extending their product families into the 100 plus seating category Overall the third edition looks at a broader selection of analytical approaches than previously and considers how fleet planning for cost leader airlines differs from that of network carriers Buying the Big Jets is an industry specific example of strategic planning and is therefore a vital text for students engaged in graduate or post graduate studies either in aeronautics or business administration The book is essential reading for airline planners with fleet planning responsibility consultancy groups analysts studying aircraft performance and economics airline operational personnel students of air transport leasing companies aircraft value appraisers and all who manage commercial aircraft acquisition programmes and provide strategic advice to decision makers It is also a valuable tool for the banking community where insights into aircraft acquisition decisions are vital Federal Register ,2012-03

actividades humanas sino que interactúa y se nutre y hace su aporte a ellas creando la necesidad de un sólido vínculo interdisciplinario. Ahora bien si bien conocemos la existencia de esta necesidad de creación de un fuerte vínculo interdisciplinario también sabemos que en esta tarea nos encontramos con una gran barrera en el mismo la comunicación. A partir de esto es posible considerar varios impedimentos en esa barrera. Uno de los más importantes es el idioma como factor concurrente está el uso de regionalismos y como consecuencia de ellos la aplicación de jergas específicas. Desde los albores de la aviación hemos convivido con ese problema sucede que al incrementarse día a día el número de operaciones al crecer el parque aeronáutico y convertirse la aviación en una necesidad para el resto de las actividades humanas las condiciones inseguras los incidentes y los accidentes continuamente produciéndose quedando de manifiesto las falencias de la industria en ese aspecto. Las nuevas tecnologías en materiales los nuevos métodos de diseño y los planes de mantenimiento con técnicas de inspección no destructivas han reducido los riesgos latentes de fallas técnicas pero no todos los aspectos relacionados con la vida humana puede solucionarlos la tecnología por lo que en paralelo con los desarrollos tecnológicos se han creado conceptos de gestión del factor humano que han contribuido en gran medida a la seguridad operacional y desde el año 1978 su estudio y prevención se ha expandido considerablemente por lo que en todos los programas de estudio y mejoramiento de la interacción antropológica CRM MRM LOFT SHELL etc la comunicación es un vínculo importantísimo en la seguridad operacional. Si trasladamos lo expuesto a las tareas diarias ya sea en la operación de una aeronave en el mantenimiento de la misma en el control del tránsito aéreo en la administración de las empresas operadoras o en cualquier otra actividad relacionada con la industria aeroespacial se presentará el problema del uso del idioma. Ingresando los regionalismos y las jergas específicas factores tendientes a desencadenar una sucesión de eventos inseguros que podrían desembocar en un incidente o en un accidente de consecuencias catastróficas. Cuando se analiza la comunicación oral y escrita es importante tener en cuenta que si bien manejamos un vocabulario técnico en común es inevitable tanto en inglés como en español el uso de regionalismos y argot jargon en inglés. Por ejemplo un técnico ecuatoriano hablará de la bita cora de la aeronave mientras que uno argentino hablará de la libreta historial de la aeronave. Esta divergencia puede justificarse como un caso de regionalismos de países diferentes. Ahora bien en el segundo ejemplo el mismo técnico argentino en la provincia de Buenos Aires hablará de chavetas para frenar un bulón mientras que otro técnico argentino en Córdoba hablará de cupillas para frenar un bulón. En paralelo se puede ver también que los diferentes fabricantes tienen lexicos específicos con respecto a sus productos por ejemplo uno de los más conocidos fabricantes británicos de motores posee un sistema propio de códigos de denominación y aplicación de Boletines de Servicio no mandatorios muy distinto al que manejan sus competidores directos de Estados Unidos y Canadá. Por eso la intención de este manual es contemplar una cantidad importante de tales divergencias presentándolas en cada asiento específico para que el uso del término y el concepto se apliquen con la mayor propiedad posible. La propuesta de este manual es constituirse

en una obra de referencia pensada como apoyo idiomático para interpretar y utilizar con mayor exactitud todos los niveles en que se presenta la terminología aeronáutica y contribuir a la aclaración de las dudas que continuamente se dan en la traducción de ambas lenguas en los diferentes campos de la aviación
