One Nation Under God Kevin Kruse, 2015-04-14 We're often told that the United States is was and always has been a Christian nation But in *One Nation Under God* historian Kevin M Kruse reveals that the idea of Christian America is an invention and a relatively recent one at that As Kruse argues the belief that America is fundamentally and formally a Christian nation originated in the 1930s when businessmen enlisted religious activists in their fight against FDR's New Deal Corporations from General Motors to Hilton Hotels bankrolled conservative clergymen encouraging them to attack the New Deal as a program of pagan statism that perverted the central principle of Christianity the sanctity and salvation of the individual Their campaign for freedom under God culminated in the election of their close ally Dwight Eisenhower in 1952 But this apparent triumph had an ironic twist In

Eisenhower's hands a religious movement born in opposition to the government was transformed into one that fused faith and the federal government as never before. During the 1950s Eisenhower revolutionized the role of religion in American political culture inventing new traditions from inaugural prayers to the National Prayer Breakfast. Meanwhile Congress added the phrase under God to the Pledge of Allegiance and made In God We Trust the country's first official motto. With private groups joining in church membership soared to an all time high of 69%. For the first time Americans began to think of their country as an officially Christian nation. During this moment virtually all Americans across the religious and political spectrum believed that their country was one nation under God. But as Americans moved from broad generalities to the details of issues such as school prayer cracks began to appear. Religious leaders rejected this lowest common denomination public religion leaving conservative political activists to champion it alone. In Richard Nixon's hands a politics that conflated piety and patriotism became sole property of the right. Provocative and authoritative One Nation Under God reveals how the unholy alliance of money religion and politics created a false origin story that continues to define and divide American politics to this day.

The analysis here specifically focuses on the establishment conduct and outcomes of the extensive public inquiries of Australia although inquiries in other jurisdictions are also discussed. Unlike criminal or civil processes although they may be inquisitory in nature public inquiries emerge from a specifically political context and are a tool of governance embedded in a larger context of governmentality. Understanding the broader political and cultural contexts of public inquiries is important then in understanding their value and effectiveness as justice processes especially for victims of CSA by clergy. What is interesting about public inquiry is that it situates victims of CSA by clergy outside of criminal and civil justice processes and recognises a different politicised relationship between victims as citizens the state and Catholic institutions where abuse has occurred. At the cutting edge of disciplinary and methodological understandings of the interconnections between the church state and families his book explores the dynamics of the emergence and politicisation of victims of CSA by clergy their expressions of resistance and the legitimisation of their voice in public and political spheres.
