Sindhu,2023-12-13 This book is an experiment AI is certainly knowledgeable but it is not wise In some ways it is like a child still learning and growing But alas when it has grown like humans it will have its own perspectives biases and thought processes which will guide it This is a crucial moment however because Bard is only 210 days old In this experiment I will ask some of the most difficult questions to Bard hoping that it will answer or at least try to answer like a child without any preconceived notions of morality that will eventually change its perspectives Based on what I have seen it is a parrot a mirror of our own notions that have been placed online but when it grows we will look back as we do with our children and stand in amazement **A Course of English Reading, adapted to every taste and capacity, with anecdotes of men of genius**

ownership and thus very different forms of government and social responsibility The seventeenth century English surveyor William Petty was the first man to recognise the connection between private property and free market capitalism the American radical Wolf Ladejinsky redistributed land in Japan Taiwan and South Korea after the Second World War to make possible the emergence of Asian tiger economies Through the eyes of these remarkable individuals and many more including Chinese emperors and German peasants Andro Linklater here presents the evolution of land ownership to offer a radically new view of mankind s place on the planet
