**Kenya** Charles Hornsby,2013-03-01 Since independence from Great Britain in 1963 Kenya has survived five decades as a functioning nation state holding regular elections its borders and political system intact and avoiding open war with its neighbours and military rule internally It has been a favoured site for Western aid trade investment and tourism and has remained a close security partner for Western governments However Kenya s successive governments have failed to achieve adequate living conditions for most of its citizens violence corruption and tribalism have been ever present and its politics have failed to transcend its history The decisions of the early years of independence and the acts of its leaders in the decades since have changed the country s path in unpredictable ways but key themes of conflicts remain over land money power economic policy national autonomy and the distribution of resources between classes and communities While the country s political institutions have remained stable the nation has changed its population increasing nearly five fold in five decades But the economic and political elite s struggle for state resources and the exploitation of ethnicity for political purposes still threaten the country s existence Today Kenyans are arguing over many of the issues that divided them 50 years ago The new constitution promulgated in 2010 provides an opportunity for national renewal but it must confront a heavy legacy of history This book reveals that history

*South Sudan Skills Story* Lawrence M. Tombe, 2017-09-28 The South Sudan Skills Story is an account about manpower and education development in South Sudan a narrative that includes efforts exerted in attainment of the much needed workforce for fuelling the countrys economy now fatally impacted by the ongoing internal strife Prior to escalation of the armed conflict that broke out in December 2013 hardly four years after the country gained its sovereignty on July 9 2011 the new nation was on course in setting up its new education system and basis of sustainable human development now shattered by the vicious war The conflict has eroded the countrys human potential through loss of life skills wastage and extreme brutalities perpetrated against citizens by the war drivers The education quandary is compounded by displacement of over 3 million people from their homes and localities a dire situation that has caused severe food insecurity affecting over 7.5 million people With over 2 million children forced out of school particularly in the most conflict affected regions of South Sudan including over 1.4 million forced out of the country as refugees to neighbouring countries it means that one in every three children in the country is out of school The scale and magnitude of the unending human dispersal has severely curtailed South Sudans ability to provide education to all its citizens The once adopted slogan of bringing education to all in the country is now a far cry as the new nation heads to total collapse if the conflict is not halted The South Sudan Skills Story urges the leaders of South Sudan who are proponents of the conflict to rise above self serving political cleavages to stop the war for peace so that all the citizens are availed the opportunity to realize their fullest potential for development of the country The narrative concludes that the people of this young nation will remain one of the most undereducated populations in the world as long as the legacy of war violence and impunity prevails in the country

**The End of the Refugee Cycle?** Richard Black, Khalid Koser, 1999-01-01 At the start of the 1990s there was great optimism that the end of the Cold War might also mean the end of the refugee cycle both a breaking of the cycle of violence persecution and flight and the completion of the cycle for those able to return to their homes The 1990s it was hoped would become the decade of repatriation However although over nine million refugees were repatriated worldwide between 1991 and 1995 there are reasons to believe that it will not necessarily be a durable solution for refugees It certainly has become clear that the end of the refugee cycle has been much more complex and ultimately more elusive than expected The changing constructions and realities of refugee repatriation provide the backdrop for this book which presents new empirical research on examples of refugee repatriation and reconstruction Apart from providing up to date material it also fills a more fundamental gap in the literature which has tended to be based on pedagogical reasoning rather than actual field research Adopting a global perspective this volume draws together conclusions from highly varied

experiences of refugee repatriation and defines repatriation and reconstruction as part of a wider and interrelated refugee cycle of displacement exile and return The contributions come from authors with a wealth of relevant practical and academic experience spanning the continents of Africa Asia Central America and Europe      **Eye Proteins—Advances in Research and Application: 2012 Edition** ,2012-12-26 Eye Proteins Advances in Research and Application 2012 Edition is a ScholarlyBrief that delivers timely authoritative comprehensive and specialized information about Eye Proteins in a concise format The editors have built Eye Proteins Advances in Research and Application 2012 Edition on the vast information databases of ScholarlyNews You can expect the information about Eye Proteins in this eBook to be deeper than what you can access anywhere else as well as consistently reliable authoritative informed and relevant The content of Eye Proteins Advances in Research and Application 2012 Edition has been produced by the world s leading scientists engineers analysts research institutions and companies All of the content is from peer reviewed sources and all of it is written assembled and edited by the editors at ScholarlyEditions and available exclusively from us You now have a source you can cite with authority confidence and credibility More information is available at <http://www.ScholarlyEditions.com>      **African Research & Documentation** ,1998      **An Ethic of Hospitality** Emily Jeptepkeny Choge,2020-07-30 In our increasingly xenophobic world countries are turning away refugees and immigrants Based on the situation in Kenya this book offers a countercultural ethic of hospitality and welcome to the stranger an ethic fraught with dangers and yet filled with great opportunities for transforming our world Drawing on the scriptural pilgrim motif and specifically on the book of Hebrews this study paints a picture of refugees not only as needy strangers to be herded into camps but as brothers and sisters who bring with them treasures and talents that can enrich our understanding of our Christian identity and mission as pilgrims in the world The hospitality practice seen in Hebrews offers hope and promise not only for refugees themselves but also for the pilgrim church Like the ancient heroes of faith portrayed in Hebrews we too live as pilgrims and aliens who await with hope the city whose architect and founder is God Refugees in fact teach us how to live our pilgrim identity they become teachers not only for the church in Kenya but also for the body of Christ worldwide      **Forum** ,1982      Proceedings of ISES World Congress 2007 (Vol.1-Vol.5) D. Geology and Health H. Catherine W. Skinner, Antony R. Berger, 2003-03-20 Geology and Health is an integration of papers from geo bio chemical scientists on health issues of concern to humankind worldwide demonstrating how the health and well being of populations now and in the future can benefit through coordinated scientific efforts International examples on dusts coal arsenic fluorine lead mercury and water borne chemicals that lead to health effects are documented and explored They were selected to illustrate how hazards and potential hazards may be from natural materials and processes and how anthropomorphic changes may have contributed to disease and debilitation instead of solutions Introductory essays by the editors highlight some of the progress toward scientific integration that could be applied to other geographic sites and research efforts A global purview and integration of earth and health sciences expertise could benefit the future of populations from many countries Effective solutions to combat present and future hazards will arise when the full scope of human interactions with the total environment is appreciated by the wide range of people in positions to make important and probably expensive decisions A case to illustrate the point of necessary crossover between Geology and Health was the

drilling of shallow tube wells in Bangladesh to provide non contaminated ground water This good solution unfortunately mobilized arsenic from rocks into the aquifer and created an unforeseen or silent hazard arsenic Geologists produce maps of earth materials and are concerned with natural processes in the environment with long time frame horizons The health effects encountered through changing the water source might have been avoided if the hydrological characteristics of the Bangladesh delta had been known and any chemical hazards had been investigated and documented A recurrence of this type of oversight should be avoidable when responsible parties often government officials appreciate the necessity of such integrated efforts The book extols the virtues of cooperation between the earth life and health sciences as the most practical approach to better public health worldwide      *Advances in Legumes for Sustainable Intensification* Ram Swaroop Meena,Sandeep Kumar,2022-06-29 *Advances in Legume based Agroecosystem for Sustainable Intensification* explores current research and future strategies for ensuring capacity growth and socioeconomic improvement through the utilization of legume crop cultivation and production in the achievement of sustainability development goals SDGs Sections cover the role of legumes in addressing issues of food security improving nitrogen in the environment environmental sustainability economic environmentally optimized systems the importance and impact of nitrogen organic production and biomass potential legume production biology breeding improvement cropping systems and the use of legumes for eco friendly weed management This book is an important resource for scientists researchers and advanced students interested in championing the effective utilization of legumes for agronomic and ecological benefit Focuses on opportunities for agricultural impact and sustainability Presents insights into both agricultural sustainability and eco intensification Includes the impact of legume production on societal impacts such as health and wealth management      **Kenya's Running Women** Michelle M Sikes,2023-12-01 Since Pauline Konga s breakthrough performance at the 1996 summer Olympics in Atlanta the world has become accustomed to seeing Kenyan women medal at major championships sweep marathons and set world records Yet little is known about the pioneer generation of women who paved the way for Kenya s reputation as an international powerhouse in women s track and field In *Kenya's Running Women A History* historian and former professional runner Michelle M Sikes details the triumphs and many challenges these women faced from the advent of Kenya s athletics program in the colonial era through the professionalization of running in the 1980s and 1990s Sikes reveals how over time running became a vehicle for Kenyan women to expand the boundaries of acceptable female behavior *Kenya's Running Women* demonstrates the necessity of including women in histories of African sport and of incorporating sport into studies of African gender and nation building      *Internationalisation of African Higher Education* Chika Sehoole,Jane Knight,2013-10-30 The role of higher education especially the international dimension is given little importance in the discourse on achieving the Millennium Development Goals MDGs in Africa This book aims to change that The potential of higher education s contribution to Africa s development remains unrealized and often misunderstood In today s globalised world which

prioritises economic growth through liberalised trade and competitive market strategies much emphasis has been placed on higher education's ability to produce graduates to serve the labour market and produce new knowledge for the knowledge economy. While these are important contributions the book argues that international higher education and new knowledge must go beyond economic purposes and serve the human and social development needs of the continent. It is against this background that the African Network for the Internationalisation of Education (ANIE) undertook research on the international dimension of higher education in Africa and its role in the achievement of the MDGs. Through empirical research seven case studies address how international and regional higher education programmes and policies in African universities can address MDG priorities of promoting gender equality and women's empowerment, combating HIV/AIDS and establishing global partnerships for development through academic mobility, joint research initiatives, curriculum innovation and policy development.

**Lake Naivasha, Kenya** David M. Harper, R. Boar, Mark Everard, P. Hickley, 2003-05-31. This is the first comprehensive study of an east African lake for thirty years. It represents the culmination of research expeditions which stretch back twenty years and is thus able to pick up long term changes which the individual research activities do not reveal. Lake Naivasha is a tropical lake whose natural fluctuations are now dwarfed by human impacts. Papers show how the irrigation for horticulture and power cooling has reduced the lake depth significantly, exotic arrivals have altered the plant community beyond recognition and its commercial value as a fishery and a tourist feature are reduced by over use. Despite this the lake has considerable conservation value at present. It provides a different case study in the ever growing library of the effects of human follies. Lake Naivasha has achieved global importance in the past ten years because its waters are used to sustain the largest horticultural industry in Africa. The book highlights its fragility under such pressure and points out the way towards sustainable use of the water and the ecosystem.
