

U. DEPTH- Adjusts the intensity of the chorus effect. A lower setting will introduce a subtle yet distinct effect, whereas a higher setting will create a more dramatic effect. With both the RATE (Item S) and DEPTH controls set midway or higher, a variety of vibrato/tremolo type effects can be achieved.

V. CHORUS INDICATOR- This LED is illuminated when the stereo chorus is active. The color of the LED is modulated red and green by the chorus sweep LFO to give a visual indication of the sweep rate.

W. FOOTSWITCH- Plug-in connection for remote footswitch to switch between the Normal and Drive channels and to activate the Stereo Chorus mode. For proper operation of the footswitch, both DRIVE SELECT (Item Q) and CHORUS SELECT (Item T) switches should be out. NOTE: Any good quality patch cord will work with the remote footswitch; however, a speaker grade cord is preferable to a coax guitar cord when it is available.

X. MONO FX SEND- This jack provides an unbalanced mono output signal from the preamp at a point before the internal CHORUS circuits. This output can be used in conjunction with the MONO FX RETURN (Item Y) as a patch point for mono effects devices. (SEE EFFECTS LOOP CONNECTION DIAGRAMS.) The MONO FX SEND can also be used to feed recording and sound reinforcement mixers a dry signal. (For a signal with internal CHORUS, use the STEREO FX SEND (Item Z) jack.) Additionally this output can be used to drive another ULTIMATE CHORUS as a slave amp. This is done by connecting a standard guitar cord from the MONO FX SEND jack of the master amplifier to the MONO FX RETURN jack of the slave.

Y. MONO FX RETURN- This unbalanced jack inputs signal to the stereo chorus-generating circuitry, which drives the stereo power amp section. It automatically disconnects the preamp and reverb circuitry when used. This is useful when using the MONO FX option or when using the ULTIMATE CHORUS as a slave amplifier for a mono signal source. The CHORUS is active in the slave so that a stereo image will be generated if it is used.

Z. STEREO FX SEND- This jack provides an unbalanced stereo output from the preamp, reverb and chorus circuits of the ULTIMATE CHORUS. This output can be used in conjunction with the STEREO FX RETURN (Item AA) as a patch point for stereo effects devices. (SEE EFFECTS LOOP CONNECTION DIAGRAMS.) The Stereo Effects Loop jacks are standard 1/4 inch Tip-Ring-Sleeve types, with the left channel signal on the tip and the right channel signal on the ring. This send can also be used to feed a stereo signal to two channels of a recording or sound reinforcement mixer. Additionally this output can be used to drive another ULTIMATE CHORUS as a slave amp. This is done by connecting a shielded stereo cord from the STEREO FX SEND jack of the master amplifier to the STEREO FX RETURN jack of the slave.

AA. STEREO FX RETURN- This stereo jack inputs signal directly to the left and right power amps. It automatically disconnects the preamp, reverb and chorus circuitry when used. This is useful when using the ULTIMATE CHORUS as a slave amplifier for a stereo signal source.

BB. POWER SWITCH- Turns A.C. power ON and OFF. When the switch is OFF the amplifier is completely shut down.
