OBJECTIVE

NOTE: You have four choices for each objective type question as A, B, C and D. The choice which you think is correct, fill that circle in front of that question number. Use marker or pen to fill the circles. Cutting or filling two or more circles will result in zero mark in that question.

QUESTION NO. 1

	When dielectric material is placed in an electric field it (A) conducts (B) exhibit electric charge (C) undergoes electrolysis (D) becomes po	larized
	(A) R/C (B) C/R (C) R x C (D) \(\sqrt{RC} \) Equivalent resistance when two resistances are connected in parallel is given by	
	(A) $R_1 + R_2$ (B) $R_1 + R_2$ (C) R_1R_2 (D) R_1R_2	
	R_1R_2 $R_1 + R_2$ $R_1 - R_2$	
- 1	When Ohm meter measures infinite resistance, its pointer lies at	
	(A) Centre of scale (B) Left end of scale (C) Right end of scale (D) Out of scale	
	A proper combination of a galvanometer and a series resistance acts as (A) Ohm meter (B) Volt meter (C) Ammeter (D) Potentiometer	
- 1	A transformer	
- 1	(A) transformers power (B) generates emf (C) transforms voltage (D) transforms en	bergy
- 1	When a motor is just started, the back emf is	
- 5	(A) maximum (B) minimum (C) infinity (D) Almost zero	
	In D.C circuits, current and voltage are controlled by (A) capacitor (B) inductor (C) Resistor (D) gate	
. 1	The reactance x _c of capacitor is given by	
- 1	(A) $x_c = 2 \pi fc$ (B) $x_c = \pi fc$ (C) $x_c = \frac{1}{2 \pi fc}$ (D) $x_c = \frac{1}{2 \pi f}$	
- 1	2 π fc 2 π f	
0	Semiconductor resistivity ranges	
	(A) 10° to 10° (B) 10° to 10° (C) 10° to 10° (D) 10° to 10°10	
1	The mathematical symbol for NOR operation is	
2	(A) $x = A.B$ (B) $x = \overline{A.B}$ (C) $x = A+B$ (D) $x = \overline{A+B}$ Emitter current IE in transistor is given by	
	(A) IE = IC/IB (B) IE = IB/IC (C) IE = IB + IC (D) IE = IC - IB	
3	(A) $IE = IC/IB$ (B) $IE = IB/IC$ (C) $IE = IB + IC$ (D) $IE = IC - IB$ The condition $hf > 2 moc^2$ refers to	
_ 3	(A) Compton effect (B) pair production (C) Photoelectric effect (D) Annihilation	of man
•	Momentum of photon is	
5	(A) h/e (B) e/h (C) hf/e (D) \(\nu\h)	
	An atom can reside in excited state for (A) 10 ⁻⁸ Sec (B) one second (C) 10 ⁻³ Sec (D) 10 ⁻¹⁰ Sec	
	The SI unit of radiation dose is	
6	(A) Roentgen (B) Curie (C) Grey (D) Rem	
7	The particles equal in mass or greater than protons are called	
-	(A) leptons (B) baryons (C) mesons (D) muons	
*	ICS, GROUP SECOND 12th CLASS - 12013) TIME: 2.8 SUBJECTIVE MAPKS	40 HOLE
	SUBJECTIVE SECTION NO. 2 Write short answers a ny Eight (8) questions of the following (1) Give statement of Gauss's law. Write down it's mathematical form	68
	(1) Give statement of Gauss's law. Write down it's mathematical form (2) How can you identify that which plate of a capacitor is positively charged (3) Electric lines of forces never cross why? (4) Define electron volt and sho v that 1 ev = 1.6 x 10 ⁻¹⁹ J (5) How can you use magnetic field to separate the isotopes of a chemical element?	
	 (3) Electric lines of forces never cross why? (4) Define electron volt and sho v that I ev = 1.6 x 10⁻¹⁹ J 	lar in them
	 (3) Electric lines of forces never cross why? (4) Define electron volt and sho v that I ev = 1.6 x 10⁻¹⁹ I (5) How can you use magnetic field to separate the isotopes of a chemical element? (6) Briefly give the function of cathode and Grid in C.R.O. (7) What is Lorentz force? Give the role of electric and magnetic force in this regard? (8) Two charged panticles are projected into a region where there is a magnetic field perpendicul to their velocities. If the charged deflected in opposite directions. What can you say about the following the projected in the charged functions. What can you say about the propendicular control of the charged magnetic social lating freely in a horizontal plane. The oscillation are strongly divided a metal plate is places under the magnet. Explain why this occur (12) How can the nower losses by minimized in a transformer why this occur 	lar st them "
TES.	 (3) Electric lines of forces never cross why? (4) Define electron volt and sho v that I ev = 1.6 x 10⁻¹⁹ I (5) How can you use magnetic field to separate the isotopes of a chemical element? (6) Briefly give the function of cathode and Grid in C.R.O. (7) What is Lorentz force? Give the role of electric and magnetic force in this regard? (8) Two charged panticles are projected into a region where there is a magnetic field perpendicul to their velocities. If the charged deflected in opposite directions. What can you say about the following the projected in the charged functions. What can you say about the propendicular control of the charged magnetic social lating freely in a horizontal plane. The oscillation are strongly divided a metal plate is places under the magnet. Explain why this occur (12) How can the nower losses by minimized in a transformer why this occur 	
ES	 (3) Electric lines of forces never cross why? (4) Define electron volt and sho v that I ev = 1.6 x 10⁻¹⁹ I (5) How can you use magnetic feld to separate the isotopes of a chemical element? (6) Briefly give the function of cathode and Grid in C.R.O. (7) What is Lorentz force? Give the role of electric and magnetic force in this regard? (8) Two charged particles are projected into a region where there is a magnetic field perpendicul to their velocities. If the charges are deflected in opposite directions. What can you say about their velocities are projected into a region where there is a magnetic field perpendicul to their velocities. If the charges are deflected in opposite directions. What can you say about the properties of the charges are units. (10) Show that £ and Δ Φ/Δ have same units. (11) A suspended magnet is oscillating freely in a horizontal plane. The oscillation are strongly dividen a metal plate is places under the magnet. Explain why this occur (12) How can the power losses by minimized in a transformer (13) Write short answers any Eight (8) questions of the following (14) De hends in a wire affect its electric resistance? Evolution 	
ES	 (3) Electric lines of forces never cross why? (4) Define electron volt and sho v that I ev = 1.6 x 10⁻¹⁹ I (5) How can you use magnetic field to separate the isotopes of a chemical element? (6) Briefly give the function of cathode and Grid in C.R.O. (7) What is Lorentz force? Give the role of electric and magnetic force in this regard? (8) Two charged particles are prejected into a region where there is a magnetic field perpendicul to their velocities. If the charges are deflected in opposite directions, What can you say about their velocities are prejected into a region where there is a magnetic field perpendicul to their velocities. If the charges are deflected in opposite directions, What can you say about their velocities is and Ler z's law. (10) Show that £ and Δ Φ/Δ have same units. (11) A suspended magnet is oscillating freely in a horizontal plane. The oscillation are strongly dividen a metal plate is places under the magnet. Explain why this occur. (12) How can the power losses by minimized in a transformer. (13) Do bends in a wire affect its electric resistance of the following. (2) Give the colour code. 	
TES	(3) Electric lines of forces never cross why? (4) Define electron volt and sho v that I ev = 1.6 x 10 ⁻¹⁰ J (5) How can you use magnetic field to separate the isotopes of a chemical element? (6) Briefly give the function of cathode and Grid in C.R.O (7) What is Lorentz force? Give the role of electric and magnetic force in this regard? (8) Two charged particles are projected into a region where there is a magnetic field perpendicul to their velocities. If the charges are deflected in opposite directions, What can you say about State Faraday's law and Lerz's law. (10) Show that £ and \$\int O/O \subseteq T\$ have same units. (11) A suspended magnet is oscillating freely in a horizontal plane. The oscillation are strongly directly and the plane of the plane of the magnet. Explain why this occur. (12) How can the power leaves are the plane of the following. (13) Ob bends in a wire affect its electric resistance? Explain (14) Oive any two properties of parallel resonant circuit.	
ES	(3) Electric lines of forces never cross why? (4) Define electron volt and sho v that I ev = 1.6 x 10 ⁻¹⁰ J (5) How can you use magnetic field to separate the isotopes of a chemical element? (6) Briefly give the function of cathode and Grid in C.R.O (7) What is Lorentz force? Give the role of electric and magnetic force in this regard? (8) Two charged particles are projected into a region where there is a magnetic field perpendicul to their velocities. If the charges are deflected in opposite directions. What can you say about the control of their velocities are projected into a region where there is a magnetic field perpendicul to their velocities. If the charges are deflected in opposite directions. What can you say about the project of the charges are deflected in opposite directions. What can you say about the project of the project of the project of the confidence of the magnet. Explain why this occur when a metal place is placed under the magnet. Explain why this occur is provided in a transformer. (12) How can the power losses by minimized in a transformer. (23) Write short answers try Eight (8) questions of the following. (24) Object the colour code: (25) Object in project of the conductor rise with temperature? (36) Office the colour code of the conductor rise with temperature? (37) Object in project of the conductor rise with temperature?	
ΙES	(3) Electric lines of forces never cross why? (4) Define electron volt and sho v that I ev = 1.6 x 10 ⁻¹⁰ I (5) How can you use magnetic field to separate the isotopes of a chemical element? (6) Briefly give the function of cathode and Grid in C.R.O (7) What is Lorentz force? Give the role of electric and magnetic force in this regard? (8) Two charged particles are projected into a region where there is a magnetic field perpendicul to their velocities. If the charges are deflected in opposite directions. What can you say about their velocities is a constant of their velocities. If the charges are deflected in opposite directions. What can you say about their velocities is a constant of their velocities. If the charges are deflected in opposite directions. What can you say about their velocities is a constant of the constant of the oscillation are strongly divided by the constant of the following of the colour code of the constant of the constant of the constant of the colour code of the constant of the constant of the constant of the colour code of the constant of the colour code of the constant	
ES	(3) Electric lines of forces never cross why? (4) Define electron volt and sho v that I ev = 1.6 x 10 ⁻¹⁰ J (5) How can you use magnetic field to separate the isotopes of a chemical element? Fsc Physics Old Paper 23 Introduction

In this digital age, the convenience of accessing information at our fingertips has become a necessity. Whether its research papers, eBooks, or user manuals, PDF files have become the preferred format for sharing and reading documents. However, the cost associated with purchasing PDF files can sometimes be a barrier for many individuals and organizations. Thankfully, there are numerous websites and platforms that allow users to download free PDF files legally. In this article, we will explore some of the best platforms to download free PDFs. One of the most popular platforms to download free PDF files is Project Gutenberg. This online library offers over 60,000 free eBooks that are in the public domain. From classic literature to historical documents, Project Gutenberg provides a wide range of PDF files that can be downloaded and enjoyed on various devices. The website is user-friendly and allows users to search for specific titles or browse through different categories. Another reliable platform for downloading Fsc Physics Old Paper 23 free PDF files is Open Library. With its vast collection of over 1 million eBooks, Open Library has something for every reader. The website offers a seamless experience by providing options to borrow or download PDF files. Users simply need to create a free account to access this treasure trove of knowledge. Open Library also allows users to contribute by uploading and sharing their own PDF files, making it a collaborative platform for book enthusiasts. For those interested in academic resources, there are websites dedicated to providing free PDFs of research papers and scientific articles. One such website is Academia.edu, which allows researchers and scholars to share their work with a global audience. Users can download PDF files of research papers, theses, and dissertations covering a wide range of subjects. Academia.edu also provides a platform for discussions and networking within the academic community. When it comes to downloading Fsc Physics Old Paper 23 free PDF files of magazines, brochures, and catalogs, Issuu is a popular choice. This digital publishing platform hosts a vast collection of publications from around the world. Users can search for specific titles or explore various categories and genres. Issuu offers a seamless reading experience with its user-friendly interface and allows users to download PDF files for offline reading. Apart from dedicated platforms, search engines also play a crucial role in finding free PDF files. Google, for instance, has an advanced search feature that allows users to filter results by file type. By specifying the file type as "PDF," users can find websites that offer free PDF downloads on a specific topic. While downloading Fsc Physics Old Paper 23 free PDF files is convenient, its important to note that copyright laws must be respected. Always ensure that the PDF files you download are legally available for free. Many authors and publishers voluntarily provide free PDF versions of their work, but its essential to be cautious and verify the authenticity of the source before downloading Fsc Physics Old Paper 23. In conclusion, the internet offers numerous platforms and websites that allow users to download free PDF files legally. Whether its classic literature, research papers, or magazines, there is something for everyone. The platforms mentioned in this article, such as Project Gutenberg, Open Library, Academia.edu, and Issuu, provide access to a vast collection of PDF files. However, users should always be

cautious and verify the legality of the source before downloading Fsc Physics Old Paper 23 any PDF files. With these platforms, the world of PDF downloads is just a click away.

FAQs About Fsc Physics Old Paper 23 Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, guizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Fsc Physics Old Paper 23 is one of the best book in our library for free trial. We provide copy of Fsc Physics Old Paper 23 in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Fsc Physics Old Paper 23. Where to download Fsc Physics Old Paper 23 online for free? Are you looking for Fsc Physics Old Paper 23 PDF? This is definitely going to save you time and cash in something you should think about.
