Liu, Robert Joseph Serfling, Diane L. Souvaine, The book is a collection of some of the research presented at the workshop of the same name held in May 2003 at Rutgers University The workshop brought together researchers from two different communities statisticians and specialists in computational geometry The main idea unifying these two research areas turned out to be the notion of data depth which is an important notion both in statistics and in the study of efficiency of algorithms used in

computational geometry Many of the articles in the book lay down the foundations for further collaboration and interdisciplinary research Information for our distributors Co published with the Center for Discrete Mathematics and Theoretical Computer Science beginning with Volume 8 Volumes 1-7 were co published with the Association for Computer Machinery ACM Expert Systems in Construction and Structural Engineering H. Adeli, 2003-09-02 Expert Systems in Construction and Structural Engineering is a valuable reference both for researchers interested in the state of the art of civil engineering expert systems and practitioners interested in exploring the practical applications of this new technology
