**Handbook of Climate Change Adaptation** Nicholas Oguge, Desalegn Ayal, Lydia Adeleke, Izael da Silva, 2021-05-20 This open access book discusses current thinking and presents the main issues and challenges associated with climate change in Africa It introduces evidences from studies and projects which show how climate change adaptation is being and may continue to be successfully implemented in African countries Thanks to its scope and wide range of themes surrounding

climate change the ambition is that this book will be a lead publication on the topic which may be regularly updated and hence capture further works Climate change is a major global challenge However some geographical regions are more severely affected than others One of these regions is the African continent Due to a combination of unfavourable socio economic and meteorological conditions African countries are particularly vulnerable to climate change and its impacts The recently released IPCC special report Global Warming of 1.5°C outlines the fact that keeping global warming by the level of 1.5°C is possible but also suggested that an increase by 2.0°C could lead to crises with crops agriculture fed by rain could drop by 50% in some African countries by 2020 and livestock production could damage water supplies and pose an additional threat to coastal areas The 5th Assessment Report produced by IPCC predicts that wheat may disappear from Africa by 2080 and that maize a staple will fall significantly in southern Africa Also arid and semi arid lands are likely to increase by up to 8% with severe ramifications for livelihoods poverty eradication and meeting the SDGs Pursuing appropriate adaptation strategies is thus vital in order to address the current and future challenges posed by a changing climate It is against this background that the African Handbook of Climate Change Adaptation is being published It contains papers prepared by scholars representatives from social movements practitioners and members of governmental agencies undertaking research and or executing climate change projects in Africa and working with communities across the African continent Encompassing over 100 contributions from across Africa it is the most comprehensive publication on climate change adaptation in Africa ever produced

**A Political Ecology of Kenya's Mau Forest** Lisa Elena Fuchs, 2023. A timely and important examination of the environmental crises investigating their biophysical, political, economic and socio-cultural aspects that reveals why previous conservation efforts failed. The eastern part of the Mau Forest, the most important closed canopy forest in East Africa, has come under severe threat since the 1990s. In this political ecology, Lisa Fuchs explores the failure of the government-led forest restoration and rehabilitation initiative to Save the Mau, launched in 2009. The author examines two of the most contentious issues in Kenya since colonial times: land and the environment. She sheds light on the structural factors and the role of individuals in the forest's destruction and of non-protection and traces the colonial legacy of post-independent environmental conservation policies and practices. In doing so, Fuchs demonstrates that the Mau crisis is more than an environmental crisis; it is also a political, an economic and a socio-cultural crisis. Though a detailed empirical analysis, the author shows that the Mau crisis led to the near-collapse of landscapes and livelihoods in the Mau Forest ecosystem. She traces the implementation of insufficient conservation programmes which resulted from historical path dependency and the adoption of global environmental governance blueprints for forest allocation and benefits and exposes a forest management system that prioritises commercial forest production over biodiversity conservation. Access and entitlements to the highly fertile forest land and the amalgamation of forest rehabilitation with the reclamation of grabbed public forest are emphasised as a further core contributor to the crisis. The socio-cultural dynamics within and among various forest-dwelling communities, including the indigenous hunting and gathering Ogiek and in migrant groups, are also analysed. The book highlights that local types of environmentalism are caught between the invention of traditions and perverse modernisation and shows the contradictory effects of the celebrated, highly anticipated but poorly executed Save the Mau initiative and how the presence of political will to maintain the crisis conditioned its perseverance. Finally, the book proposes realistic alternatives to sustainable forest management in politicised environments whose relevance and applicability are considerable in this age of anthropogenic environmental crises and conflicts. Published in association with IFRA/AFRICA.
