## **Human Past Chris Scarre:**

The Human Past Christopher Scarre, 2018 A comprehensive and indispensable guide to world prehistory now completely updated     **The Human Past** Chris Scarre, 2024-01-15 With the most diverse author team to date the Fifth Edition brings new specialists new research and new perspectives to the field connecting our present to the past in a more equitable and representative way Careful reconsideration of each chapter's level of detail resulted in a book that is 13% briefer but which remains a comprehensive authority on world prehistory with each chapter written by leading experts on that region     *The Human Past* Christopher Scarre, 2009 The Human Past has established itself as the most authoritative introduction to social cultural and economic developments in human prehistory     **The Human Past Essentials** Christopher Scarre, Tammy Stone, 2021 This textbook provides an archaeological overview of human prehistory throughout the world     *The Human Past* Chris Scarre, 2024-08-29     *The Story of Food in the Human Past* Robyn E. Cutright, 2021-01-26 A sweeping overview of how and what humans have eaten in their long history as a species The Story of Food in the Human Past How What We Ate Made Us Who We Are uses case studies from recent archaeological research to tell the story of food in human prehistory Beginning with the earliest members of our genus Robyn E Cutright investigates the role of food in shaping who we are as humans during the emergence of modern Homo sapiens and through major transitions in human prehistory such as the development of agriculture and the emergence of complex societies This fascinating study begins with a discussion of how food shaped humans in evolutionary terms by examining what makes human eating unique the use of fire to cook and the origins of cuisine as culture and adaptation through the example of Neandertals The second part of the book describes how cuisine was reshaped when humans domesticated plants and animals and examines how food expressed ancient social structures and identities such as gender class and ethnicity Cutright shows how food took on special meaning in feasts and religious rituals and also pays attention to the daily preparation and consumption of food as central to human society Cutright synthesizes recent paleoanthropological and archaeological research on ancient diet and cuisine and complements her research on daily diet culinary practice and special purpose mortuary and celebratory meals in the Andes with comparative case studies from around the world to offer readers a holistic view of what humans ate in the past and what that reveals about who we are     Justice for People on the Move Gillian Brock, 2020-02-20 Offers a comprehensive framework that can assist in responding to new justice challenges for people on the move     **The Origins of Religion in the Paleolithic** Gregory J. Wightman, 2014-12-18 How did religion emerge and why What are the links between behavior environment and religiosity Diving millions of years into the past to a time when human ancestors began grappling with issues of safety worth identity loss power and meaning in complex and difficult environments Gregory J Wightman explores the significance of goal directed action and the rise of material culture for the advent of religiosity and ritual The book opens by tackling questions of cognitive evolution and group psychology and how these ideas can integrate with archaeological

evidence such as stone tools shell beads and graves In turn it focuses on how human ancestors engaged with their environments how those engagements became routine and how eventually certain routines took on a recognizably ritualistic flavor Wightman also critically examines the very real constraints on drawing inferences about prehistoric belief systems solely from limited material residues Nevertheless Wightman argues that symbolic objects are not merely illustrative of religion but also constitutive of it in the continual dance between brain and behavior between internal and external environments lie the seeds of ritual and religion Weaving together insights from archaeology anthropology cognitive and cultural neuroscience history and philosophy of religions and evolutionary social and developmental psychology Wightman provides an intricate evidence based understanding of religion s earliest origins *The Right to Be Punished* Gabriel Hallevy,2012-10-12 Does an offender have the right to be punished The right to be punished may sound like an oxymoron but it is not necessarily so With the emergence of modern criminal law the offender gained the right to be punished by rational criminal law rather than being lynched by an angry mob The present day offender may have the right to be punished by doctrinal sentencing rather than being subjected to verdicts based on vague unclear and uncertain principles In modern criminal law the imposition of criminal liability follows accurate and strict rules whereas there are no similar rules for the imposition of punishment The process of sentencing is vague and obscure as are the considerations used for the imposition of punishments The objective of the present book is to propose a comprehensive general and legally sophisticated theory of modern doctrinal sentencing The challenges of such a legal theory are plenty and complex In addition to increasing clarity and certainty modern doctrinal sentencing must deal with modern types of delinquency e g organized crime recidivism corporate offenders high tech offenses etc and modern principles of criminal law Modern doctrinal sentencing must serve to ensure optimal sentencing **Scenes from Prehistoric Life** Francis Pryor,2021-08-05 An invigorating journey through Britain s prehistoric landscape and an insight into the lives of its inhabitants Highly compelling Spectator Books of the Year An evocative foray into the prehistoric past BBC Countryfile Magazine Vividly relating what life was like in pre Roman Britain Choice Magazine Makes life in Britain BC often sound rather more appealing than the frenetic and anxious 21st century Daily Mail In *Scenes from Prehistoric Life* the distinguished archaeologist Francis Pryor paints a vivid picture of British and Irish prehistory from the Old Stone Age about one million years ago to the arrival of the Romans in AD 43 in a sequence of fifteen profiles of ancient landscapes Whether writing about the early human family who trod the estuarine muds of Happisburgh in Norfolk c 900 000 BC the craftsmen who built a wooden trackway in the Somerset Levels early in the fourth millennium BC or the Iron Age denizens of Britain s first towns Pryor uses excavations and surveys to uncover the daily routines of our ancient ancestors By revealing how our prehistoric forebears coped with both simple practical problems and more existential challenges Francis Pryor offers remarkable insights into the long and unrecorded centuries of our early history and a convincing well attested and movingly human portrait of prehistoric life as it was really lived **On Violence in History**

Philip Dwyer, Mark S. Micale, 2020-01-10 Is global violence on the decline Scholars argue that Harvard psychologist Steven Pinker's proposal that violence has declined dramatically over time is flawed This highly publicized argument that human violence across the world has been dramatically abating continues to influence discourse among academics and the general public alike In this provocative volume a cast of eminent historians interrogate Pinker's thesis by exposing the realities of violence throughout human history In doing so they reveal the history of human violence to be richer more thought provoking and considerably more complicated than Pinker claims From the introduction Not all of the scholars included in this volume agree on everything but the overall verdict is that Pinker's thesis for all the stimulus it may have given to discussions around violence is seriously if not fatally flawed The problems that come up time and again are the failure to genuinely engage with historical methodologies the unquestioning use of dubious sources the tendency to exaggerate the violence of the past in order to contrast it with the supposed peacefulness of the modern era the creation of a number of straw men which Pinker then goes on to debunk and its extraordinarily Western centric not to say Whiggish view of the world Complex historical questions as the essays in this volume clearly demonstrate cannot be answered with any degree of certainty and certainly not in a simplistic way Our goal here is not to offer a final definitive verdict on Pinker's work it is rather to initiate an ongoing process of assessment that in the future will incorporate as much of the history profession as possible

**The Birth of the Anthropocene** Jeremy Davies, 2016-05-24 The world faces an environmental crisis unprecedented in human history Carbon dioxide levels have reached heights not seen for three million years and the greatest mass extinction since the time of the dinosaurs appears to be underway Such far reaching changes suggest something remarkable the beginning of a new geological epoch It has been called the Anthropocene The Birth of the Anthropocene shows how this epochal transformation puts the deep history of the planet at the heart of contemporary environmental politics By opening a window onto geological time the idea of the Anthropocene changes our understanding of present day environmental destruction and injustice Linking new developments in earth science to the insights of world historians Jeremy Davies shows that as the Anthropocene epoch begins politics and geology have become inextricably entwined

**Why Did Ancient Civilizations Fail?** Scott A J Johnson, 2016-09-19 Ideas abound as to why certain complex societies collapsed in the past including environmental change subsistence failure fluctuating social structure and lack of adaptability Why Did Ancient Civilizations Fail evaluates the current theories in this important topic and discusses why they offer only partial explanations of the failure of past civilizations This engaging book offers a new theory of collapse that of social hubris Through an examination of Mesopotamian Egyptian Roman Maya Inca and Aztec societies Johnson persuasively argues that hubris blinded many ancient peoples to evidence that would have allowed them to adapt and he further considers how this has implications for contemporary societies Comprehensive and well written this volume serves as an ideal text for undergraduate courses on ancient complex societies as well as appealing to the scholar interested in societal collapse

**Agriculture ,** World

Prehistory Brian M. Fagan, Nadia Durrani, 2019-10-21 This popular introductory textbook provides an overview of more than 3 million years of human prehistory. Written in an accessible and jargon-free style, this engaging volume tells the story of humanity from our beginnings in tropical Africa up to the advent of the world's first urban civilizations. A truly global account, *World Prehistory* surveys the latest advances in the study of human origins and describes the great diaspora of modern humans in the millennia that followed as they settled Europe, Asia, and the Americas. Later chapters consider seminal milestones in prehistory: the origins of food production, the colonization of the offshore Pacific, and the development of the first more complex human societies based for the most part on agriculture and stock raising. Finally, Fagan and Durrani examine the prevailing theories regarding early state-organized societies and the often flamboyant, usually volatile preindustrial civilizations that developed in the Old World and the Americas. Fully updated to reflect new research, controversies, and theoretical debates, this unique book remains an ideal resource for the beginner first approaching archaeology. Drawing on the experience of two established writers in the field, *World Prehistory* is a respected classic that acquaints students with the fascinations of human prehistory.

*Evolution, Morality and the Fabric of Society* R. Paul Thompson, 2022-05-19 Recent interest in the evolution of the social contract is extended by providing a thoroughly naturalistic evolutionary account of the biological underpinnings of a social contract theory of morality. This social contract theory of morality, contractevolutionism, provides an evolutionary justification of the primacy of a moral principle of maximisation of the opportunities for evolutionary reproductive success (ERS), where maximising opportunities does not entail an obligation on individuals to choose to maximise their ERS. From that primary principle, the moral principles of inclusion, individual sovereignty, liberty, and equality can be derived. The implications of these principles within contractevolutionism are explored through an examination of patriarchy, individual sovereignty, and copulatory choices, and overpopulation and extinction. Contractevolutionism is grounded in evolutionary dynamics that resulted in humans and human societies. The most important behavioural consequences of evolution to contractevolutionism are reciprocity, cooperation, empathy, and the most important cognitive consequences are reason and behavioural modification.

**The Comparative Archaeology of Complex Societies** Michael E. Smith, 2011-09-05 Part of a resurgence in the comparative study of ancient societies, this book presents a variety of methods and approaches to comparative analysis through the examination of wide-ranging case studies. Each chapter is a comparative study, and the diverse topics and regions covered in the book contribute to the growing understanding of variation and change in ancient complex societies. The authors explore themes ranging from urbanization and settlement patterns to the political strategies of kings and chiefs, to the economic choices of individuals and households. The case studies cover an array of geographical settings from the Andes to Southeast Asia. The authors are leading archaeologists whose research on early empires, states, and chiefdoms is at the cutting edge of scientific archaeology.

**Reading Contemporary India** MK Raghavendra, 2025-02-11 The book is the first ever attempt to examine various sociocultural aspects of

contemporary India ranging from caste and hierarchy and the religious or political conflict resulting from it to literary practice and intellectual life in the public space and making interdisciplinary associations It does this by going back to various aspects of India s past stretching back several millennia to those owing to public policy after independence Many of the issues today such as those named above can be traced to racial mixing through centuries which has created a multitude of conflicts that need solutions today The book is divided into separate chapters corresponding to the issues needing addressing and a brief note at the conclusion of each chapter makes connections with issues dealt in other chapters The book has an introduction tracing a significant portion of India s past and an afterword identifying crisis areas in the present

*Evolution and Morality* James E. Fleming, Sanford V. Levinson, 2012-09-10 This volume emerged from papers and commentaries given at the annual meeting of the American Society for Political and Legal Philosophy ASPLP in Boston on August 28 29 2008 Preface      **The Aulos in Classical and Late Antiquity. Acculturation, Diffusion, and Syncretism**

**in Socio-Musical Processes of the Mediterranean** Juan Sebastián Correa Cáceres, 2023-06-30 The aulos an extinct musical instrument consisting of a cylindrical bore pipe with finger holes and a double reed for a mouthpiece was a very popular wind instrument during antiquity c 1000 BC AD 600 Through a comprehensive analysis of written archaeological and iconographic sources this book presents a holistic view of this musical instrument its past and its consequential history This study is further substantiated by ethnographic data from Sardinia and Egypt where the launeddas and the argmul were explored respectively A new understanding of the history of the aulos is presented through the establishment of parallels between past and contemporary music related practices
