A Catalogue of Modern law Books Steves and Sons, 1869 International Law Wade Mansell, Karen

Openshaw, 2019-08-22. This new edition provides a critical introduction to the concepts, principles and rules of international law through a consideration of contemporary international events. It examines both the possibilities and limitations of the legal method in resolving international disputes and notes the actual effects of international law upon international disagreements. Such an approach remains sceptical rather than cynical and is intended to provide the means by which the role of international law may be evaluated. This entails discussion of the legal quality of international law, the relationship between international law and international relations, the Eurocentricity of international law and the connection between political power and the ability to use or abuse or ignore international law. The new edition explores the impact of the United States' latest direction in foreign policy, arguably an intensification of pre-existing neo-conservative trends, considers in greater depth the issue of economic self-determination in relation to ex-colonial nations, expands the discussion of jurisdiction to cover immunity from jurisdiction and covers recent developments at the International Criminal Court. Underlying the book is the assertion that international law is political in content in the sense of being concerned with the exercise of power but that it draws much of its effectiveness from its self-portrayal as being apolitical or at least politically neutral.

International Law in the US Legal System Curtis A. Bradley, 2021. International Law in the U.S. Legal System provides a wide-ranging overview of how international law intersects with the domestic legal system of the United States and points out various unresolved issues and areas of controversy. Curtis Bradley explains the structure of the U.S. legal system and the various separation of powers and federalism considerations implicated by this structure, especially as these considerations relate to the conduct of foreign affairs. Against this backdrop, he covers all of the principal forms of international law: treaties, executive agreements, decisions and orders of international institutions, customary international law, and jus cogens norms. He also explores a number of issues that are implicated by the intersection of U.S. law and international law, such as treaty withdrawal, foreign sovereign immunity, international human rights litigation, war powers, extradition, and extraterritoriality. This book highlights recent decisions and events relating to the topic, including various actions taken during the Trump

administration while also taking into account relevant historical materials including materials relating to the U S Constitutional founding Written by one of the most cited international law scholars in the United States the book is a resource for lawyers law students legal scholars and judges from around the world **International Human Rights Law**

to speak of a paradigmatic and ideological change in the international legal system one that also involves a transition from a state centred international order to a human centred one and from inter state justice to global justice The book addresses three fundamental aspects of the modernization process of international law the possible widening of the concept of international community and of the classic assumptions of statehood the possible diversification of the sources of general international law and the ability of international law to adapt to new challenges and to achieve the main goals for humanity set by the United Nations The overall objective of the book is to provide the tools for a deeper understanding of the transition phase of contemporary international law by examining the major problems that characterize this phase The book will also stimulate critical reflection on the future prospects of international law
