Tripp,2012-04-27 Low external input technology or LEIT is an increasingly prominent subject in discussions of sustainable agriculture There are growing calls for self sufficient agriculture in an era experiencing diminishing returns from reliance upon expensive synthetic pesticides and fertilizers There are many reasons to support strategies for low external input farming including a concern for environmental sustainability increased attention to resource poor farmers and marginal environments and the conviction that a better use of local resources in small scale agriculture can improve farm productivity and innovation But despite the increased attention to self sufficient agriculture there is little evidence available on the performance and impact of LEIT This book examines the contributions and limitations of low external input technology for addressing the needs of resource poor farmers For the first time a balanced analysis of LEIT is provided offering in depth case studies an analysis of the debates an extensive review of the literature and practical suggestions about the management and integration of low external input agriculture in rural development programmes *Statistical Pocket Book of the Democratic Socialist Republic of Sri Lanka* ,1991 *International Books in Print*, 1995 Barbara Hopkinson,[Anonymus AC01401231],1995 **The Political Economy of NGOs** Jude L.
