**Highly complex syllable structure: A typological and diachronic study** Shelece Easterday,2019-11-13 The syllable is a natural unit of organization in spoken language whose strongest cross linguistic patterns are often explained in terms of a universal preference for the CV structure Syllable patterns involving long sequences of consonants are both typologically rare and theoretically marginalized with few approaches treating these as natural or unproblematic structures This book is an investigation of the properties of languages with highly complex syllable patterns The two aims are i to establish whether these languages share other linguistic features in common such that they constitute a distinct linguistic type and ii to identify possible diachronic paths and natural mechanisms by which these patterns come about in the history of a language These issues are investigated in a diversified sample of 100 languages 25 of which have highly complex syllable patterns Languages with highly complex syllable structure are characterized by a number of phonetic phonological and morphological features which serve to set them apart from languages with simpler syllable patterns These include specific segmental and suprasegmental properties a higher

prevalence of vowel reduction processes with extreme outcomes and higher average morpheme word ratios The results suggest that highly complex syllable structure is a linguistic type distinct from but sharing some characteristics with other proposed holistic phonological types including stress timed and consonantal languages The results point to word stress and specific patterns of gestural organization as playing important roles in the diachronic development of these patterns out of simpler syllable structures

Martel,2014-03-27 To invest in vice can be a sound financial decision but despite the lure of healthy profits individuals and mutual funds have been reluctant to invest in this type of stock After all who would take pride in supporting the tobacco industry knowing it sells a deadly product And what social responsibilities do investors bear with respect to compulsive gamblers who have lost so much money that suicide becomes an attractive option Canada the Good considers more than five

hundred years of debates and regulation that have conditioned Canadians attitudes towards certain vices Early European settlers implemented a Christian moral order that regulated sexual behaviour gambling and drinking Later some transgressions were diagnosed as health issues that required treatment Those who refused the label of illness argued that behaviours formerly deemed as vices were within the range of normal human behaviour This historical synthesis demonstrates how moral regulation has changed over time how it has shaped Canadians lives why some debates have almost disappeared and others persist and why some individuals and groups have felt empowered to tackle collective social issues Against the background of the evolution of the state the enlargement of the body politic and mounting forays into court activism the author illustrates the complexity over time of various forms of social regulation and the control of vice    The Routledge Handbook of Second Home Tourism and Mobilities C. Newton,2016-04-02 Remarkable progress in neuro oncology due to increased utilization of advanced imaging in clinical practice continues to accelerate in recent years Refinements in magnetic resonance imaging MRI and computed tomography CT technology and the addition of newer anatomical functional and metabolic imaging methods such as MRS fMRI diffusion MRI and DTI MRI have allowed brain tumor patients to be diagnosed much earlier and to be followed more carefully during treatment With treatment approaches and the field of neuro oncology neuroimaging changing rapidly this second edition of the Handbook of Neuro Oncology Neuroimaging is so relevant to those in the field providing a single source comprehensive reference handbook of the most up to date clinical and technical information regarding the application of neuro Imaging techniques to brain tumor and neuro oncology patients This new volume will have updates on all of the material from the first edition and in addition will feature several new important chapters covering diverse topics such as advanced imaging techniques in radiation therapy therapeutic treatment fields response assessment in clinical trials surgical planning of neoplastic disease of the spine and more It will also serve as a resource of background information to neuroimaging researchers and basic scientists with an interest in brain tumors and neuro oncology Provides a

**[Encounters on the Opposite Coast: The Dutch East India Company and the Nayaka State of Madurai in the Seventeenth Century](#)**  
Markus Vink,2015-10-14 In Encounters of the Opposite Coast Markus Vink provides a narrative of the first half century of cross cultural interaction between the Dutch East India Company VOC one of the great northern European chartered companies and Madurai one of the great southern Nayakas and successor states of the Vijayanagara empire in southeast India c 1645 1690 A shared interest in trade and at times converging political objectives formed the unstable foundations for a complex relationship fraught with tensions a mixture of conflict and coexistence typical of the age of contained conflict Drawing extensively on archival materials Markus Vink covers a topic neglected by both Company historians and their Indian counterparts and sheds important light on a black hole in South Indian history    *The Closing of the Muslim Mind* Robert R. Reilly,2023-06-20 Islam's Intellectual Suicide and the Threat to Us All People are shocked and frightened by the behavior coming out the Islamic world not only because it is violent but also because it is seemingly inexplicable While there are many answers to the question of what went wrong in the Muslim world no one has decisively answered why it went wrong Until now In this eye opening new book foreign policy expert Robert R Reilly uncovers the root of our contemporary crisis a pivotal

struggle waged within the Muslim world nearly a millennium ago In a heated battle over the role of reason the side of irrationality won The deformed theology that resulted produced the spiritual pathology of Islamism and a deeply dysfunctional culture Terrorism from 9 11 to London Madrid and Mumbai to the Christmas 2009 attempted airline bombing is the most obvious manifestation of this crisis But Reilly shows that the pathology extends much further The Closing of the Muslim Mind solves such puzzles as why peace is so elusive in the Middle East why the Arab world stands near the bottom of every measure of human development why scientific inquiry is nearly dead in the Islamic world why Spain translates more books in a single year than the entire Arab world has in the past thousand years why some people in Saudi Arabia still refuse to believe man has been to the moon why Muslim media frequently present natural disasters like Hurricane Katrina as God s direct retribution Delving deeper than previous polemics and simplistic analyses The Closing of the Muslim Mind provides the answers the West has so desperately needed in confronting the Islamist crisis
