Handbook of Social Work in Health and Aging Barbara Berkman, 2006-02-09 The Handbook of Social Work in Health and Aging is the first reference to combine the fields of health care aging and social work in a single authoritative volume These areas are too often treated as discrete entities while the reality is that all social workers deal with issues in health and aging on a daily basis regardless of practice specialization As the baby boomers age the impact on practice in health and aging will be dramatic and social workers need more specialized knowledge about aging health care and the resources available to best serve older adults and their families The volume's 102 original chapters and 13 overviews written by the most experienced and prominent gerontological health care scholars in the United States and across the world provide social work practitioners and educators with up to date knowledge of evidence based practice guidelines for effectively assessing and treating older adults and their families new models for intervention in both community based practice and institutional care and knowledge of significant policy and research issues in health and aging A truly monumental resource this handbook represents the best research on health and aging available to social workers today

Construction Digitalisation Douglas Aghimien, Clinton Aigbavboa, Ayodeji Oke, Wellington Thwala, 2021-07-25 This book explores construction digitalisation particularly in

developing countries The book conceptualises a digitalisation capability maturity model that will enable construction organisations to self assess and benchmark their digital capabilities in their quest for digital transformation Digitalisation offers a significant solution to the age long problems of the construction industry Research shows that when construction organisations transform from a traditional service delivery approach to a more digitalised approach significant improvement in project delivery and better competitive advantage for these organisations will be attained The attainment of these benefits is evident in developed countries where the digitalisation of construction activities continues apace Unfortunately the story is not the same for construction organisations in developing economies While some organisations might be willing to be digitally transformed most have no clue how to go about it To this end this book provides guidelines for construction organisations seeking to transform their entities digitally Its content is a valuable read for construction company owners as it provides a model which they can use in the digitalisation of their activities Also regulatory bodies in the construction industry can adopt the capabilities identified in the book as essential prerequisites for their members Furthermore the book serves as excellent theoretical background reading for management researchers seeking to expand their knowledge on the digitalisation of the construction industry and other associated industries
