**A Practical Guide to Nature-Based Practice** Niki Buchan, 2017-02-09 WINNER OF THE 2018 NURSERY WORLD STAFF RESOURCES AWARD. There is a growing realisation that children in the Early Years benefit from being involved in wild spaces. They need dynamic and complex outdoor environments and opportunities for risk and challenge to play with abandon, have first-hand experiences, places where there is adventure, delight, daring, and joy. In this exciting book, outdoor education guru Niki Buchan offers ideas for natural learning in the Early Years. She provides a background to forest school and its relevance to Early Years settings, outlines the challenges and benefits of free play and a risk-taking disposition in children, and uses case studies from educators to explore the concept of nature-based practice. *A Practical Guide to Nature-Based Practice* presents ideas for outdoor learning that can be used all year round, whatever the season. This full-colour book will help adults and children alike to reconnect with their local environment, making it a must-have for any Early Years setting.

*Embedding STEAM in Early Childhood Education and Care* Caroline Cohrssen, Susanne Garvis, 2021-05-28 This book approaches STEAM (Science, Technology, Engineering, the Arts, and Mathematics) in early childhood education from multiple angles. It focuses on the teaching and learning of children from two years of age to the early years of school. Proponents of STEAM describe how it can create opportunities for children to learn creatively, and various chapter authors make strong connections between discipline areas within the context of an informal curriculum. Others advocate for an integrated STEM rather than STEAM approach. With a light touch on theory and a focus on how to embed STEAM in an integrated early childhood curriculum, the editors and contributors examine the STEAM versus STEM question from multiple angles. The chapters provide helpful frameworks for parents, teachers, and higher education institutions, and make practical suggestions of ways to support young children's inquiry learning. Drawing on pedagogy and research from around the world, this book will be of interest to scholars of STEAM education, early childhood educators, students of early childhood education, and parents of young children.

In this rich resource, she offers processes and protocols for documenting learning and analyzing data, resources and planning tools to help you design and execute your own projects, and a digital documentation notebook that you can download for guidance, inspiration, and examples.
