Productivity underpins business success and national well being and thus it is crucial to understand the factors that influence productivity growth This volume provides a comprehensive exploration into the significance of productivity growth for business the economy and for social economic progress It examines how productivity is defined measured and implemented It also surveys the dispersion of productivity across time and place focusing on the productivity dynamics that either leads to a reallocation of resources that reduces dispersion and increases aggregate productivity or conversely allows dispersion to persist behind barriers to productivity enhancing reallocation A third focus is an investigation of the drivers of or impediments to productivity growth some of which are organizational in nature and under management control and others of which are institutional in nature and subject to public policy intervention The Oxford Handbook of Productivity Analysis contains contributions of distinguished productivity experts from around the world who analyze a wide range of timely issues These issues concern purely analytical topics surrounding the measurement of productivity in various situations beginning with the ideal situation in which all inputs and all outputs and their prices are observed accurately They also include service sectors such as education in which the services provided are hard to define much less measure and other sectors that generate undesirable environmental externalities that are difficult to price and complicate the very definition of productivity The issues also involve business management topics ranging from the role of business models and benchmarking to the quality of management practices the adoption of new technologies and possible complementarities between the two The relationship between productivity and business performance is also explored At a more aggregate level the issues range from the impacts of market power incentive regulation international trade and global value chains on productivity to the contribution of productivity to economic development and economic welfare **OECD Compendium of Productivity**

Indicators 2012 OECD,2012-12-19 This document presents an overview of recent trends in productivity level and growth in OECD countries based on a large set of indicators It also highlights the measurement issues involved in compiling indicators used for the analysis of issues related to productivity OECD Compendium of Productivity Indicators 2023

OECD,2023-02-21 This report presents a comprehensive overview of productivity in OECD and to the extent possible G20 economies This edition also presents important insights on productivity measurement and evolution since the COVID 19 pandemic including a shift share analysis showing how within industry developments and reallocations across industries have contributed to aggregate labour productivity developments in the recent period and in the longer term **Handbook of Innovation Indicators and Measurement** Fred Gault,Anthony Arundel,Erika Kraemer-Mbula,2023-09-06 Providing nuanced insight into key areas of innovation studies this erudite second edition acknowledges the significance of innovation within the informal economy It contributes to the broader scholarly discourse on innovation indicators and measurement exploring the nature and rate of recent developments within the field Compilation Manual for an Index of Services Production OECD,2007-07-03 The OECD Compilation Manual for Index of Services Production contains guidelines and methodologies to measure short term production activities of the services sector by national agencies and international organisations *Development Patterns of Material Productivity* Larissa Talmon-Gros,2014-02-10 Increasing concerns regarding the world s natural resources and sustainability continue to be a major issue for global development As a result several political initiatives and strategies for green or resource efficient growth both on national and international levels have been proposed A core element of these initiatives is the promotion of an increase of resource or material productivity This dissertation examines material productivity developments in the OECD and BRICS countries between 1980 and 2008 By applying the concept of convergence stemming from economic growth theory to material productivity the analysis provides insights into both aspects material productivity developments in general as well potentials for accelerated improvements in material productivity which consequently may allow a reduction of material use globally The results of the convergence analysis underline the importance of policy making with regard to technology and innovation policy enabling the production of resource efficient products and services as well as technology transfer and diffusion *Understanding Economic Statistics: An OECD Perspective* OECD,2008-10-08 Drawing on OECD statistics in particular *Understanding Economic Statistics* an OECD perspective shows readers how to use statistics to understand the world economy It gives an overview of the history key concepts and the main providers of economic statistics **Handbook of Production Economics** Subhash C. potential impact of COVID 19 on productivity and examines the role of Multifactor Productivity MFP as a major driver of economic growth and changes in living standards *The Short and Winding Road to 2030 Measuring Distance to the SDG Targets* OECD,2022-04-27 The 2030 Agenda for Sustainable Development has an unprecedented ambition but also confronts countries with an enormous challenge given the complex and integrated nature of the Agenda with its 17 Goals underpinned by 169 Targets To assist national governments with their implementation the OECD has developed a unique methodology allowing comparison of progress across SDG goals and targets and also over time **OECD Science, Technology and Industry Scoreboard 2005** OECD,2005-10-11 The STI Scoreboard provides a comprehensive statistical picture of countries performance in the areas of science technology globalisation and industry *The Oxford Handbook of Well-Being and Public Policy* Matthew D. Adler,Marc Fleurbaey,2016-04-21 What are the methodologies for assessing and improving governmental policy in light of well being The Oxford Handbook of Well Being and Public Policy provides a comprehensive interdisciplinary treatment of this topic The contributors draw from welfare economics moral philosophy and psychology and are leading scholars in these fields The Handbook includes thirty chapters divided into four Parts Part I covers the full range of methodologies for evaluating governmental policy and assessing societal condition including both the leading approaches in current use by policymakers and academics such as GDP cost benefit analysis cost effectiveness analysis inequality and poverty metrics and the concept of the social welfare function and emerging techniques Part II focuses on the nature of well being What most fundamentally determines whether an individual life is better or worse for the person living it Her happiness Her preference satisfaction Her attainment of various objective goods Part III addresses the measurement of well being and the thorny topic of interpersonal comparisons How can we construct a meaningful scale of individual welfare which allows for comparisons of well being levels and differences both within one individual s life and across lives Finally Part IV reviews the major challenges to designing governmental policy around individual well being *The System of Macroeconomic Accounts Statistics* International Monetary Fund,2007-08-29 Designed to meet the basic needs of economists and statisticians this pamphlet is unique in providing an explanation of the key principles underlying macroeconomic statistics when viewed as an integrated system It highlights the interrelationships between the various sectors and provides a bridge linking the various macroeconomic accounts statistics national accounts balance of payments government finance statistics and monetary and financial statistics to assist the reader in understanding the main concepts underlying these statistics It does so by simplifying many of the concepts explaining common features and differences showing how the four key statistical areas harmonize and providing examples to demonstrate the practical application and uses of the concepts within the conceptual framework The pamphlet completely updates Pamphlet No 29 Macroeconomic Accounts An Overview by Poul H Ist Madsen which was published in 1985 *OECD Green Growth Studies Towards Green Growth: Monitoring Progress OECD Indicators* OECD,2011-05-25 This book provides measurement tools including indicators to support countries

efforts to achieve economic growth and development while ensuring that natural assets continue to provide the resources and environmental services on which well being relies **OECD Compendium of Productivity Indicators 2015**

OECD,2015-05-04 The OECD Compendium of Productivity Indicators 2015 presents a comprehensive overview of recent and longer term trends in productivity levels and growth in OECD countries *Modeling the impacts of agricultural support policies on emissions from agriculture* Laborde Debucquet, David,Mamun, Abdullah ,Martin, Will Piñeiro,Piñeiro, Valeria,Vos, Rob,2020-07-24 To understand the impacts of support programs on global emissions this paper considers the impacts of domestic subsidies price distortions at the border and investments in emission reducing technologies on global greenhouse gas GHG emissions from agriculture In a step towards a full evaluation of the impacts it uses a counterfactual global model scenario showing how much emissions from agricultural production would change if agricultural support were abolished worldwide The analysis indicates that without subsidies paid directly to farmers output of some emission intensive activities and agricultural emissions would be smaller Without agricultural trade protection however emissions would be higher This is partly because protection reduces global demand more than it increases global agricultural supply and partly because some countries that currently tax agriculture have high emission intensities Policies that directly reduce emission intensities yield much larger reductions in emissions than those that reduce emission intensities by increasing overall productivity because overall productivity growth creates a rebound effect by reducing product prices and expanding output A key challenge is designing policy reforms that effectively reduce emissions without jeopardizing other key goals such as improving nutrition and reducing poverty While the scenario analysis in this paper does not propose any particular policy reform it does provide an important building block towards a full understanding the impacts of repurposed agricultural support measures on mitigation of greenhouse gas emissions and adaptation to climate change That full analysis is being undertaken in subsequent work which will also take account of land use change and alternative forms of agricultural policy support to align objectives of food security farmers income security production efficiency and resilience and environmental protection
