

## ► E ◀ TIMING BELT INSTALLATION

- (1) Place the camshaft sprocket timing marks at the positions shown.

### NOTE

After aligning the sprocket timing marks, let go of the sprockets. The exhaust camshaft sprocket will rotate by one tooth in the direction shown and remain stable in this position.

- (2) Align the crankshaft timing mark with the timing mark on the front case.

- (3) Turn the exhaust camshaft sprocket in the direction shown and fit the timing belt with the timing marks aligned.

- (4) Use a bulldog clip to prevent the timing belt teeth from jumping.

- (5) Fit the timing belt onto the idler pulley, crankshaft sprocket, and tensioner pulley in that order.

### NOTE

When fitting the belt, keep the camshaft sprocket timing marks correctly aligned and keep the tension side of the belt tight.

- (6) Loosen the tensioner pulley mounting bolts by  $\frac{1}{4}$  to  $\frac{1}{2}$  of a turn and allow the tensioner spring to apply tension to the timing belt.

- (7) Remove the bulldog clip.

- (8) Turn the crankshaft twice in the normal rotating direction (clockwise) and check that the timing marks are correctly aligned.

### Caution

This procedure utilizes the camshaft's driving torque to apply tension evenly to the timing belt. Be sure to turn the crankshaft as described above. Do not turn the crankshaft in reverse.

- (9) Tighten the tensioner pulley mounting bolts.
