- 2) Touch **GPS Information.**

This displays the GPS information screen.

## Display Contents

- 1) **Current location name**
- 2) **Current location latitude/longitude**
- 3) **Number of GPS satellites being received**

### ADVICE

- When ③ is displayed, effective radio signals are being received from four or more GPS satellites and 3D position measurement, which measures the three dimensions of latitude, longitude, and altitude, is possible.
- When ② is displayed, effective radio signals are being received from three or less GPS satellites and 2D position measurement, which measures the two dimensions of latitude and longitude is possible. In this case, the positional precision is less than for 3D position measurement.
- If neither mark is displayed, this shows that effective radio signals are not being received from GPS satellites and the system is in the state of not measuring position.

- 4) **North Up**  
Touching this allows you to change the map of satellite locations to the north reference so that up is north.
- 5) **Heading Up**  
Touching this allows you to change the map of satellite locations to the heading reference so that up is the direction your car is traveling.
- 6) **Map of satellite locations**  
Allows you to check the location of the GPS satellites being received. The GPS actually being used for position calculation is displayed in yellow and those not being used are displayed in grey.
- 7) **Back**  
Touching this returns the display to the info menu (P24).
