**Consumer's Guide to a Brave New World** Wesley J. Smith, 2004-01-01 Scare headlines about the first human clones appear in our newspapers Biotech companies brag about manufacturing human embryos as products for use in medical treatments Events are moving so fast and biotechnology seems so complicated that many of us worry we can't keep up But now Wesley J Smith provides us with a guide to the brave new world that is no longer a figment of our imagination but a reality just around the corner of our lives Smith unravels the mystery of stem cells and shows what's at stake in the controversy over using them for research He describes the emerging science of human cloning the most radical technology in history and shows how it moves forward inexorably against the moral consensus of the world But at the core of this highly readable and carefully researched book is a report on the gargantuan Big Biotech industry and its supporters in the universities and the science and bioethics establishments Smith reveals how the lure of huge riches mixed with the ideology of scientism threatens to impose on society a new eugenics that would dismantle ethical norms and call into question the uniqueness and importance of all human life At stake he warns is whether science will continue to serve society or instead dominate it In Consumer's Guide to a Brave New World Smith presents a clear-eyed vision of two potential futures In one we will use biotechnology as a powerful tool to treat disease and improve the quality of our lives But in another darker scenario we will be steered onto the antihuman path that Aldous Huxley and other prophetic writers warned against half a century ago

**The Brave New World of Work** Ulrich Beck, 2014-11-05 In this important book Ulrich Beck one of the leading social thinkers in Europe today examines how work has become unstable in the modern world and presents a new vision for the future Beck begins by describing how the traditional work society with its life-long job paths is giving way to a much less stable world in which skills can be suddenly devalued jobs obliterated welfare cover reduced or eliminated The West would appear to be heading towards a social structure of ambiguity and multiple activity that has hitherto been more characteristic of the developing world But what appears to be the end of traditional working practices can also be seen as an opportunity to develop new ideas and models for work in the twenty-first century Beck's alternative vision is centred on the concept of active citizens democratically organized in local and increasingly also regional or transnational networks Against the threat of social exclusion everyone can and must have a right to be included in a new definition and distribution of work This will involve constant movement between formal employment with a major reduction in working hours and forms of self-organized artistic cultural and political civil labour providing equal access to comprehensive social protection The aim must be to turn insecurity around so that it becomes a positive and enriching discontinuity of life Drawing on his earlier work on risk and reflexive modernization The Brave New World of Work is also closely linked to his studies on globalization and individualization These processes are part of the same challenge upon which a politics of modernity must now base itself Not only the future of work but also the

very survival of democracy and the welfare state will depend on the development of a newly committed and multi active transnational citizenship This book will be of great interest to second and third year students in sociology politics geography and the social sciences generally It will also appeal to a broader audience interested in the issues and debates surrounding the changing nature of work

**Education for Knowing** Paul A. Wagner, Frank K. Fair, 2020-10-30 If our goal is Education for Knowing as the title says then we need to be guided by a conception of what knowing is For example we can all agree that there are math facts that students need to learn and we can agree that there are general concepts and laws that students should be acquainted with But is there more involved perhaps something like nurturing in students a desire to probe deeper into the workings of thing Or developing a capacity to explain why things work the way they do Our conceptions of what genuine knowing is serve as guides to what we think the goal of education is and they tell us how to build a student However as it turns out there are multiple conceptions of what knowing truly involves and these conceptions tend to be different for different sets of education stakeholders such as parents and their children school administrators and educational researchers Understanding this diversity of conceptions of knowing will make it easier for representatives of the different stakeholder groups to work together to accomplish the goal of building knowing students

A Great and Noble Occupation! Fiona Cownie, Raymond Cocks, 2009-09-03 The Society of Legal Scholars originally the Society of Public Teachers of Law was created in 1909 but was fortunate to survive its first half century It had few members lacked financial resources and was weak in influence In comparison with other university disciplines Law enjoyed a fragile status and was often held in low esteem by barristers and solicitors At times the SPTL was caught up in problems of its own making for instance refusing to admit women until the late 1940s But there were also moments of excitement and achievement the years between 1909 and the start of WWI were full of hope and new ideas and the establishment of the Journal of the Society of Public Teachers of Law in the 1920s was an important achievement for legal scholars During the social revolution of the 1960s the SPTL continued to function as a rather sedate gentleman s club gathering at its annual conference to socialise rather than to engage in academic debate The 1970s saw a sustained drive from its Young Members Group to create a new more serious organisation with better conferences and more effective decision making processes The Society evolved slowly but the process accelerated in the 1990s with members encouraged to reinforce their intellectual contribution to the discipline and act as a central point for policy debate within the legal academic community As we stand at the beginning of the twenty first century the Society with nearly 3 000 members has come a long way from its small beginnings
