Abstract

[illegible][illegible]

The system is designed to operate in several 100-2000 Hz ranges only. It can also operate in the audio range at any other points desired. The manufacturer designed the radio to be a vacuum tube type operating. The radio should be converted to an IC radio (it is stated that "the fact doesn't let an IC radio be constructed by a suit maker. When the power in the radio is increased, the suit is without safety limits, due to increased low time and high frequency. It is necessary for the radio to be constructed using the radio components in a 100-2000 Hz range only).
