**The UK Regional-National Economic Problem** Philip McCann,2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain s regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government

**European Yearbook of International Economic Law 2015** Christoph Herrmann, Markus Krajewski, Jörg Philipp Terhechte, 2015-07-04 This sixth volume 2015 of the European Yearbook of International Economic Law puts a particular emphasis on non tariff barriers NTBs to trade and the world trade order With the steady reduction of tariff rates since the GATT 47 came into force focus in recent years has been on the vast and complex landscape of non tariff barriers to trade States as well as scholars seemingly struggle with the multitude of measures pooled under this expression as there is no single acknowledged definition of the term and its relation to the term non tariff measures remains equally blurred Particularly in practice and on a multilateral level there appears to be some awkwardness when it comes to coping with NTBs since multilateral trade rules seem to be in conflict with national regulatory autonomy in the pursuit of policy objectives In part one this volume sheds light on the problems of non tariff barriers to trade that arise in various fields Part two focuses on regional integration with an emphasis on relations between

East Asia and the European Union In this regard the authors outline the trade and investment relations between the European Union and East Asia including Japan Korea and Singapore Part three offers an overview of recent institutional developments in WIPO ICSID WTO and WTO jurisprudence Part four includes book reviews of recent works in the field of international economic law and part five introduces a new section on publications in the field of international economic law that were released in 2013 and 2014

**Empire, Incorporated** Philip J. Stern, 2023-05-16 Brilliant ambitious and often surprising A remarkable contribution to the current global debate about Empire and a small masterpiece of research and conceptual reimagining William Dalrymple author of *The Anarchy* *The East India Company* *Corporate Violence* and *The Pillage of an Empire* An award winning historian places the corporation more than the Crown at the heart of British colonialism arguing that companies built and governed global empire raising questions about public and private power that were just as troubling four hundred years ago as they are today Across four centuries from Ireland to India the Americas to Africa and Australia British colonialism was above all the business of corporations Corporations conceived promoted financed and governed overseas expansion making claims over territory and peoples while ensuring that British and colonial society were invested quite literally in their ventures Colonial companies were also relentlessly controversial frequently in debt and prone to failure The corporation was well suited to overseas expansion not because it was an inevitable juggernaut but because like empire itself it was an elusive contradiction public and private person and society subordinate and autonomous centralized and diffuse immortal and precarious national and cosmopolitan a legal fiction with very real power Breaking from traditional histories in which corporations take a supporting role by doing the dirty work of sovereign states in exchange for commercial monopolies Philip Stern argues that corporations took the lead in global expansion and administration Whether in sixteenth century Ireland and North America or the Falklands in the early 1980s corporations were key players And as *Empire Incorporated* makes clear venture colonialism did not cease with the end of empire Its legacies continue to raise questions about corporate power that are just as relevant today as they were 400 years ago Challenging conventional wisdom about where power is held on a global scale Stern complicates the supposedly firm distinction between private enterprise and the state offering a new history of the British Empire as well as a new history of the corporation
