Volume 2 Jeroen Darquennes, Joseph C. Salmons, Wim Vandenbussche, 2025-04-21

Targeting a full range of students and scholars this volume provides a total of 50 chapters illustrating the linguistic dynamics and the dynamics of inter individual and societal language contact as well as the dynamics of multidisciplinary language contact studies Fueled by a wealth of data from a rich variety of contact situations its geographically balanced case studies are governed by the triangulation between a focus on language structure and change a sincere drive of sociopolitical and academic agency and the confrontation with an everyday reality that can be unkind to and ignorant of those two factors The volume clearly demonstrates the social relevance of our trade in a time burdened with ecolinguistic challenges *Geology of Ontario* Ontario. Ministry of Northern Development and Mines, Ontario Geological Survey, 1991 *Sustainable Development in Africa* Walter Leal Filho, Rudi Pretorius, Luiza Olim de Sousa, 2021-07-09 This book serves the purpose of documenting and promoting African experiences on sustainable development which encompasses both formal and non formal education Sustainable development is very important to Africa but there is a paucity of publication which documents and promotes experiences from African countries Due to their complexity the interrelations between social economic and political factors related to sustainable development especially at universities need to be better understood There is also a real need to showcase successful examples of how African institutions are handling their sustainability challenges It is against this background that this book has been produced It is a truly interdisciplinary publication useful to scholars social movements practitioners and members of governmental agencies and private companies undertaking research and or executing projects focusing on sustainability from across Africa As African nations strive to pursue the UN Sustainable Development Goals it is imperative to cater for the information needs seen across the continent and foster the dissemination of experiences and case studies which may support both on going and future efforts The scope of the book is deliberately kept wide and we are looking for contributions across the spectrum of sustainable development from business and economics to arts and fashion administration environment languages and media studies Minority Languages and Multilingual Education Durk Gorter, Victoria Zenotz, Jasone Cenoz, 2013-11-04 This book presents research on the situation minority language schoolchildren face when they need to learn languages of international communication in particular English The book takes minority languages as a starting point and it bridges local and global perspectives in the analysis of multilingual education contexts It examines the interaction of minority languages and cultures majority languages and lingua franca s in a variety of settings across different regions and countries on all continents Even though all chapters in this book involve minority languages the issues discussed are relevant to any context in which more than language is used in education The book

reveals challenges and opportunities of multilingual education by discussing issues such as Northern and Southern concepts language education policies language diversity interethnic understanding multimodal language practices power conflict identity and prestige among many others This is the volume that finally accounts for multilingual education from a truly multilingual perspective by involving proposals and research from a variety of multilingual speech communities in the world The linguistically rich Ethiopia and Mexico can teach the poor Europe and other Northern countries about multilingual education CLIL promoters may learn from Finnish Sami and Canadian Innu and Mi'gmaq indigenous communities as well as from Basque results Speakers and teachers of minority and international languages will certainly be glad to hear the news There is no need for a monolingual bias or tunnel vision in acquiring English in non English speaking communities This volume includes new challenging pedagogical perspectives while pointing to interesting conclusions for worldwide educational authorities Maria Pilar Safont Jord Universitat Jaume I Castell Spain

The Transformative Power of Language Russell H. Kaschula, H. Ekkehard Wolff, 2020-09-10 Language has played a pivotal role in societal transformation in postcolonial Africa towards the creation of globally competitive knowledge societies however so far this role has been under researched and under estimated This volume addresses this gap in the literature by bringing together a team of globally recognised scholars to explore the effect of language on African postcolonial societies and how it has contributed to achieving mental decolonisation A range of languages are explored both imported ex colonial and indigenous African and case studies from different spheres of public discourse are investigated from universities to legal settings Demonstrating that multilingualism is a resource for rather than barrier to successful transformation this book brings the intellectualisation and institutionalisation of African languages to the forefront of development discourse and provides an insightful snapshot of how current academic research public discourse political activism and social community engagement have contributed to societal transformation in South Africa
