The Inequality Paradox Douglas McWilliams, 2018-10-09 In his illuminating new book Douglas McWilliams argues that inequality is largely driven not by a conspiracy of the rich as Thomas Piketty suggests but by technology and globalization that have led to the paradox of rising inequality even as worldwide poverty drops But what are the implications of this seeming contradiction and what ultimately drives the global distribution of wealth What can societies do to reshape capitalism for the 21st century Drawing on the latest research McWilliams investigates how wealth is concentrated and why it persistently remains in the hands of very few In accessible and thought provoking prose McWilliams poses a comprehensive theory on why capitalism has not met its match in the form of increasingly disparate income distribution but warns of the coming wave of technological development the fourth industrial revolution that threatens to create a scarcity of unskilled jobs that will lead to even greater inequality and explains what governments can do to prepare for this From the inquisitive layperson to the professional economist or policymaker The Inequality Paradox is essential reading for understanding the global economy in its present state McWilliams is a fresh authoritative voice entering the global discussion making this book indispensable in preparing for the imminent economic challenges of our changing world

aviation law the book has a particular focus on how economic polycentrism and the liberal international economic order have influenced the sector's regulatory framework. It discusses the aviation industry's responses to unforeseen global events such as the COVID-19 pandemic and geopolitical conflicts, providing a detailed analysis of the legal mechanisms that ensure industry stability and resilience. Key topics include the role of arbitration in resolving disputes, the impact of international regulations, and the critical contributions of both public and private actors in shaping aviation law. Additionally, the book explores the challenges posed by new and emerging technologies such as the increasing automation in aviation systems and the legal considerations surrounding cybersecurity in aviation operations. The collection also features diverse international case studies offering practical examples of legal challenges and solutions in different contexts. By examining the intersection of various legal disciplines and the global nature of aviation, this comprehensive exploration not only reflects on past and present challenges but also provides forward-looking insights into the future of aviation law. The book will be of interest to researchers in the field of air transport law and dispute resolution, offering a thorough understanding of the legal and economic complexities facing the industry today.

Language Learning and Leisure Denyze Toffoli, Geoffrey Sockett, Meryl Kusyk, 2023-07-04. The study of informal involvement with additional languages has recently emerged as a dynamic research field in SLA. With the rapid development and spread of internet-based technologies, contact with foreign languages outside the classroom has become commonplace. While this can take multiple forms, online contents are a major driving force because they present learners with unprecedented opportunities for exposure to and use of target languages regardless of their physical location. Research from diverse geographical, educational, and socio-economic contexts brings a rich variety of perspectives to this book. It explores these phenomena via a range of theoretical frameworks and methodological approaches, focusing particularly on individual differences and language development. The volume proposes that teachers in formal learning settings should seek to support and facilitate the development of these identities and practices, and it indicates means they can adopt to best do so.

State of World Fisheries and Aquaculture Food and Agriculture Organization (FAO), 2014-10-30. This edition of The State of World Fisheries and Aquaculture highlights the vital role of fisheries and aquaculture in both food and nutrition security as well as economic expansion. The sector remains a major supplier of high-quality animal protein and supports the livelihoods and well-being of more than ten percent of the world's population. International trade in fish has reached new peaks as overall production has continued to rise. Yet, as the document underlines, an array of problems ranging from the need for more effective governance to that of ensuring environmental sustainability threatens to undermine the sector's valuable contribution to alleviating hunger and reducing poverty. Using the latest available statistics on fisheries and aquaculture, this edition presents a global analysis of the sector's status and trends.

The Metaphorical Brain Seana Coulson, Vicky T. Lai, 2016-03-09 Metaphor has been an issue of intense research and debate for decades see for example 1 Researchers in various disciplines including linguistics psychology computer science education and philosophy have developed a variety of theories and much progress has been made 2 For one metaphor is no longer considered a rhetorical flourish that is found mainly in literary texts Rather linguists have shown that metaphor is a pervasive phenomenon in everyday language a major force in the development of new word meanings and the source of at least some grammatical function words 3 Indeed one of the most influential theories of metaphor involves the suggestion that the commonality of metaphoric language results because cross domain mappings are a major determinant in the organization of semantic memory as cognitive and neural resources for dealing with concrete domains are recruited for the conceptualization of more abstract ones 4 Researchers in cognitive neuroscience have explored whether particular kinds of brain damage are associated with metaphor production and comprehension deficits and whether similar brain regions are recruited when healthy adults understand the literal and metaphorical meanings of the same words see 5 for a review Whereas early research on this topic focused on the issue of the role of hemispheric asymmetry in the comprehension and

production of metaphors 6 In recent years cognitive neuroscientists have argued that metaphor is not a monolithic category and that metaphor processing varies as a function of numerous factors including the novelty or conventionality of a particular metaphoric expression its part of speech and the extent of contextual support for the metaphoric meaning see e g 7 8 9 Moreover recent developments in cognitive neuroscience point to a sensorimotor basis for many concrete concepts and raise the issue of whether these mechanisms are ever recruited to process more abstract domains 10 This Frontiers Research Topic brings together contributions from researchers in cognitive neuroscience whose work involves the study of metaphor in language and thought in order to promote the development of the neuroscientific investigation of metaphor Adopting an interdisciplinary perspective it synthesizes current findings on the cognitive neuroscience of metaphor provides a forum for voicing novel perspectives and promotes avenues for new research on the metaphorical brain 1 Arbib M A 1989 The metaphorical brain 2 Neural networks and beyond John Wiley Sons Inc 2 Gibbs Jr R W Ed 2008 The Cambridge handbook of metaphor and thought Cambridge University Press 3 Sweetser Eve E Grammaticalization and semantic bleaching Annual Meeting of the Berkeley Linguistics Society Vol 14 2011 4 Lakoff G Johnson M 1999 Philosophy in the flesh The embodied mind and its challenge to western thought Basic books 5 Coulson S 2008 Metaphor comprehension and the brain The Cambridge handbook of metaphor and thought 177 194 6 Winner E Gardner H 1977 The comprehension of metaphor in brain damaged patients Brain 100 4 717 729 7 Coulson S Van Petten C 2007 A special role for the right hemisphere in metaphor comprehension ERP evidence from hemifield presentation Brain Research 1146 128 145 8 Lai V T Curran T Menn L 2009 Comprehending conventional and novel metaphors An ERP study Brain Research 1284 145 155 9 Schmidt G L Kranjec A Cardillo E R Chatterjee A 2010 Beyond laterality a critical assessment of research on the neural basis of metaphor Journal of the International Neuropsychological Society 16 01 1 5 10 Desai R H Binder J R Conant L L Mano Q R Seidenberg M S 2011 The neural career of sensory motor metaphors Journal of Cognitive Neuroscience 23 9 2376 2386
