Burton, Eva K. Jermakowicz, 2015-02-20

International Financial Reporting Standards A Framework based Perspective links broad concepts and general accounting principles to the specific requirements of IFRS to help students develop and understand the judgments required in using a principle based standard Although it is still unclear whether the US will adopt IFRS the global business environment makes it necessary for accounting students and professionals to be bilingual in both US GAAP and IFRS This comprehensive textbook offers A clear presentation of the concepts underlying IFRS A conceptual framework to guide students in interpreting and applying IFRS rules A comparison between IFRS and US GAAP to develop students understanding of the requirements of each standard Real world examples and case studies to link accounting theory to practice while also exposing students to different interpretations and applications of IFRS End of chapter material covering other aspects of financial reporting including international auditing standards international ethics standards and corporate governance and enforcement as well as emerging topics such as integrated accounting sustainability and social responsibility accounting and new forms of financial reporting Burton Jermakowicz have crafted a thorough and extensive tool to give students a competitive edge in understanding and applying IFRS A companion website provides additional support for both students and instructors

Near Abroad Gerard Toal, 2017 In sum by showing how and why local regional disputes quickly develop into global crises through the paired power of historical memory and time space compression Near Abroad reshapes our understanding of the current conflict raging in the center of the Eurasian landmass and international politics as a whole *Airline Operations and Management* Gerald N. Cook, Bruce G. Billig, 2017-02-03 *Airline Operations and Management* A Management Textbook is a survey of the airline industry mostly from a managerial perspective It integrates and applies the fundamentals of several management disciplines particularly economics operations marketing and finance in developing the overview of the industry The focus is on tactical rather than strategic management that is specialized or unique to the airline industry The primary audiences for this textbook are both senior and graduate students of airline management but it should also be useful to entry and junior level airline managers and professionals seeking to expand their knowledge of the industry beyond their own functional area [Materializing the Middle Passage](#) Jane Webster, 2023-10-31 An estimated 2.7 million Africans made an enforced crossing of the Atlantic on British slave ships between c 1680 and 1807 a journey that has become known as the Middle Passage This book focuses on the slave ship itself The slave ship is the largest artefact of the Transatlantic slave trade but because so few examples of wrecked slaving vessels have been located at sea it is rarely studied by archaeologists *Materializing the Middle Passage A Historical Archaeology of British Slave Shipping 1680 1807* argues that there are other ways for archaeologists to materialize the slave ship It employs a pioneering interdisciplinary methodology combining primary documentary sources maritime and terrestrial archaeology paintings maritime and ethnographic museum collections and many other sources to rebuild British slaving vessels and to identify changes to them over time The book then goes on to consider the reception of the slave ship and its trade goods in coastal West Africa and details the range and uses

of the many African resources including ivory gold and live animals entering Britain on returning slave ships The third section of the book focuses on the Middle Passage experiences of both captives and crews and argues that greater attention needs to be paid to the coping mechanisms through which Africans survived yet also challenged their captive passage Finally Jane Webster asks why the African Middle Passage experience remains so elusive even after decades of scholarship dedicated to uncovering it She considers when how and why the crossing was remembered by saltwater captives in the Caribbean and North America The marriage of words and things attempted in this richly illustrated book is underpinned throughout by a theoretical perspective combining creolization and postcolonial theory and by a central focus on the materiality of the slave ship and its regimes

Crafting the International Order Marcus M. Payk, Kim Christian Priemel, 2021 In the past few decades the understanding of the relationship between nations has undergone a radical transformation The role of the traditional nation state is diminishing along with many of the traditional vocabularies which were once used to describe what has been called ever since Jeremy Bentham coined the phrase in 1780 international law The older boundaries between states are growing ever more fluid new conceptions and new languages have emerged which are slowly coming to replace the image of a world of sovereign independent nation states which has dominated the study of international relations since the early nineteenth century This redefinition of the international arena demands a new understanding of classical and contemporary questions in international and legal theory It is the editors conviction that the best way to achieve this is by bridging the traditional divide between international legal theory intellectual history and legal and political history The aim of the series therefore is to provide a forum for historical studies from classical antiquity to the twenty first century that are theoretically informed and for philosophical work that is historically conscious in the hope that a new vision of the rapidly evolving international world its past and its possible future may emerge Book jacket

Fundamental Considerations in Technology Mediated Language Assessment Karim Sadeghi, Dan Douglas, 2023-04-27 Fundamental Considerations in

Technology Mediated Language Assessment aims to address issues such as how the forced integration of technology into second language assessment has shaped our understanding of key traditional concepts like validity reliability washback authenticity ethics fairness test security and more Although computer assisted language testing has been around for more than two decades in the context of high stakes proficiency testing much of language testing worldwide has shifted to at home mode and relies heavily on the mediation of digital technology making its widespread application in classroom settings in response to the COVID 19 outbreak unprecedented Integration of technology into language assessment has brought with it countless affordances and at the same time challenges both theoretically and practically One major theoretical consideration requiring attention is the way technology has contributed to a reconceptualization of major assessment concepts constructs There is very limited literature available on the theoretical underpinnings of technology mediated language assessment This book aims to fill this gap This book will appeal to academic specialists practitioners or professionals in the field of language assessment advanced and or graduate students and a range of scholars or professionals in disciplines like educational technology applied linguistics and teaching English to speakers of other languages TESOL *Clearinghouse Review* ,1993
