to the operational commander provided adequate time parts and tools are available High risk battle damage repairs involving possible danger to personnel or further damage to equipment are only permitted in emergencies normally in a battlefield environment and only when authorized by the unit commander or his designated representative The goal is to return a combat system to the battlefield in the least amount of time while minimizing danger to personnel and equipment BDAR techniques are not limited to simply restoring minimal functional combat capability If full mission capability can be restored expediently with a limited expenditure of time and assets it should be restored This decision is based on METT TC Some BDAR techniques if applied may result in shortened lifespan or further damage to components The commander must decide whether the risk of having one less piece of equipment outweighs the risk of applying a potentially destructive field expedient repair Each technique provides appropriate warnings and cautions which list the system s limitations caused by the action Personnel must use ground guides and extreme caution when operating recovery assets around or on an aircraft
