Koen Santifort, Bruno André Lopes, Simone Spinillo, Andrea Tipold, Joao Miguel De Frias, Susana Monforte, 2025-06-26 Case reports in veterinary neurology hold significant potential for advancing the fields of veterinary neurology and neurosurgery. These reports may document unique and rare clinical cases as well as offer insightful observations of more prevalent diseases. In all instances they provide valuable insights into the diagnostic, therapeutic and prognostic aspects of neurological disorders in animals. The detailed descriptions and originality found in case reports underscore their essential role in advancing medical science. The late Dr Robert J Higgins of UC Davis in California USA emphasized the significance of case reports stating: "Their importance in advancing knowledge becomes even more evident when we realize how much we still act as a catalyst for further research and clinical inquiry. They not only identify gaps in existing knowledge but also propose new hypotheses and occasionally challenge established paradigms. This in turn can stimulate more extensive studies and drive progress in veterinary neurology and neurosurgery. For example, a meticulously documented case report can unveil a new therapeutic approach or unexpected complication triggering broader investigations that have the potential to enhance patient care significantly." The aim of this Research Topic is to establish a lasting and prominently featured platform for the publication of case reports in veterinary neurology and neurosurgery. By sharing unique clinical experiences and outcomes, veterinarians contribute to a collective database of knowledge that benefits the entire profession. This collaborative effort can contribute to advances in the field of veterinary neurology as a whole. The journal invites submissions of case reports that focus on veterinary neurology and neurosurgery. These reports should provide detailed accounts of clinical cases that contribute significantly to the field of veterinary medicine. The scope includes but is not limited to Neurological disorders in various animal species including domestic pets, horses, large animals, wildlife and exotic animals. Innovative diagnostic techniques and their applications in veterinary neurology cases. Novel therapeutic approaches and outcomes in the management of neurological conditions. Detailed descriptions of neurosurgical procedures and postoperative care. Case reports highlighting unusual presentations of common neurological diseases. Comparative neurology and its implications for

veterinary practice New insights into neuropathology and neurodiagnostics Clinical challenges and solutions in veterinary neurology cases Drs Koen Santifort Bruno A Lopes and Simone Spinillo are employed by private veterinary hospitals All other Topic Editors declare no competing interests with regards to the Research Topic subject **Interventional Bronchoscopy** Christoph T. Bolliger, Praveen N. Mathur, 2000 This book covers all aspects of diagnostic and therapeutic bronchoscopy which go beyond the techniques of inspection simple lavage and biopsies of the tracheobronchial tree In a first section historical aspects as well as the modern use of both rigid and flexible instruments the set up of a bronchoscopy unit anaesthetic techniques and functional evaluation for patients undergoing interventional bronchoscopy are discussed A diagnostic section on transbronchial needle aspiration and bronchoscopic ultrasound is followed by extensive coverage of all existing therapeutic techniques foreign body removal laser resection electrocautery argon plasma coagulation cryotherapy brachytherapy photodynamic therapy stenting and a chapter on multi modality treatment of advanced pulmonary malignancies A fourth section deals with percutaneous image guided procedures percutaneous dilatational tracheostomy and transtracheal oxygen therapy The last section provides an in depth look at emerging bronchoscopic technology such as autofluorescence virtual bronchoscopy and gene therapy Written by the world's leading authorities in the field and beautifully illustrated this book presents the state of the art of interventional bronchoscopy It is recommended reading for pulmonologists thoracic or ENT surgeons oncologists and physicians who take an interest in bronchoscopy □□□□□□, 2006
