

Static Routing Lab

Campus Network Design & Operations Workshop

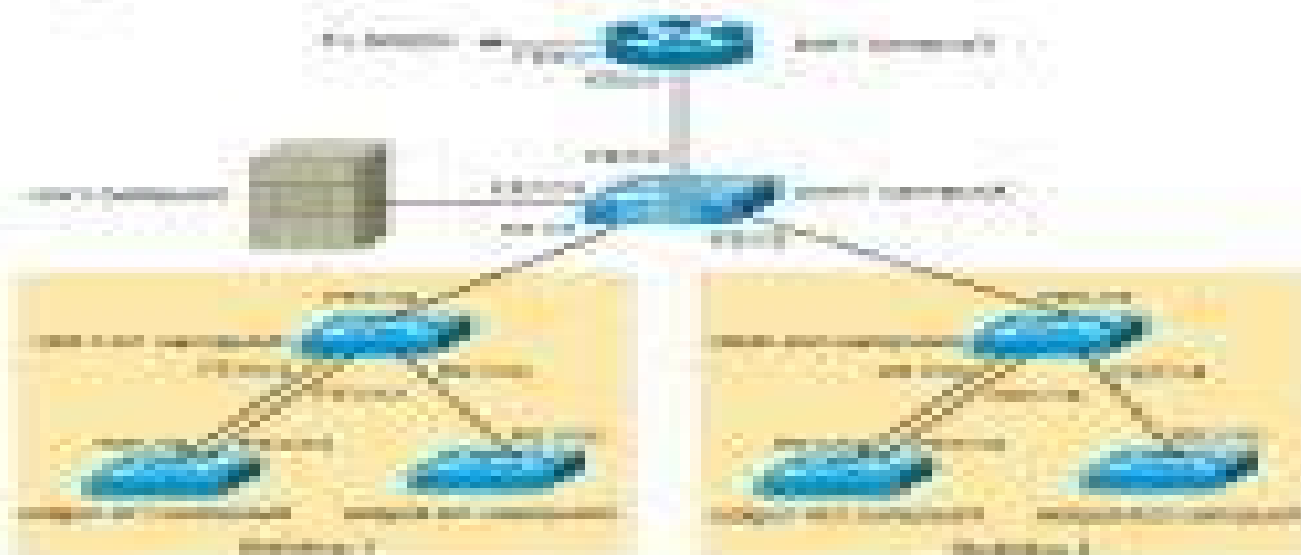

Introduction

The purpose of this lab is to make add Layer 3 functionality to our existing Routed Layer 2 network. The Core Routers have ports 1/1 connected right into the 10.10.10.0/24 routing domain, that otherwise is fully configured and is, therefore, not even going to give this campus connectivity to the border router and onwards to the WAN and the Internet.

The labs will continue in the 10 groups with each group being assigned some campus to configure, potentially will have to be trained for configuring routing for the border routers and with router lab will have some settings available up to you.

Lab Layout

The following diagram shows the layout of the devices and all the links for each campus.
