Espace Renault User Manual:

Screen Design Manual Frank Thissen, 2003-09-11 The Screen Design Manual provides designers of interactive media with a practical working guide for preparing and presenting information that is suitable for both their target groups and the media they are using. It highlights background information and relationships, clarifying them with examples and encourages the further development of the language of digital media. In addition to the basics of perception and learning psychology, ergonomics, communication theory, imagery research, and aesthetics, the book also considers design navigation and orientation elements. Guidelines and checklists along with the comprehensive design of the book support the transfer of information into practice. Frank Thissen teaches multimedia didactics and information design at the University of Applied Sciences in Stuttgart. For over 10 years, he has been developing computer-based training. He has worked for international companies such as Siemens AG and SAP AG. His research project explores the role of emotion in e-learning. www.frankthissen.de

Key Topics: Interactive media, Text for the screen, Effective use of pictures, Video animation and sound, Screen layout, Orientation and navigation, Interaction, Emotions and metamessages, Intercultural communication.

Concept Car Year in Review Automotive Engineering International, 2013-12-13 The concept and prototype cars that are shown at major industry events feature cutting-edge technologies that the automotive industry wishes to preview. Often these technologies make an appearance in future production models. Concept Car Year in Review 2013 provides insight to the key engineering ideas that were introduced in concept and prototype cars during that year. This full-color book includes articles that were previously published and written by the award-winning editors of Automotive Engineering International about these concept cars. This book provides a preview of the technologies we could experience in our vehicles in the future. It gives the reader an inside glimpse of how new ideas for vehicles are formed and how they are implemented into the cars we drive. Published for enthusiasts who are interested in future car models and their technologies, as well as practicing automotive engineers who are interested in new engineering trends such as hybrid systems, powertrain designs, automotive design, lightweighting, and materials, and new engineers who want an overview of future trends. Concept Car in Review 2013 also provides one place where readers can find information on key engineering trends over one year. Allows readers to easily find specific car models or read about all of them. Includes interviews with engineering innovators who pioneer technologies in concept cars. Features many large full-color images and an attractive magazine format.
