and importance of these contributions The Dutch East India Company was a capitalistic enterprise that had a public permanent capital and its principal objective was to continually increase profit by reinvesting its returns in the business Rather than the organisation and management of the Dutch East India Company reflecting the perceived benefits of a particular bookkeeping method the supremacy that it achieved and maintained in a very hazardous business at a time of recurring conflict between European states was a consequence of the practicalities of 17th century business and The Netherlands unique threatening natural environment which shaped its social and political institutions
