indigenous cultural practices with respect to both land and water management as well as culinary practices contribute to both sustainable food production and consumption These practices require a greater evidence base in order to be incorporated into public health nutrition initiatives related to improving dietary quality such as food based dietary guidelines for example An increased focus on the importance of local traditional and indigenous food systems and nutrition could therefore help countries to improve human nutrition and ideally help mitigate the global syndemic of obesity undernutrition and climate change This Research Topic will focus on documenting diverse local food systems and promoting elements within them that can help improve nutrition and health both human and planetary in various ways including the livelihood development of knowledge holders      **The Engineer** ,1974      *DA Pam* ,1950
