Force Projection in the Punic Wars United States Army Command and General Staff College, 2014-10-19 This book examines how several ancient states dealt with the issues of military recruitment how they differed and ultimately how these varying approaches met the needs of their countries A general overview of how ancient Mediterranean democracies raised and equipped forces to conduct operations that steadily moved from local defense to enforcing inter state policy will be given Specifically the cases of Rome and Carthage will then be examined and contrasted The emphasis will be on the mechanics of how states actually recruited their forces how commanders were appointed how they were trained what they were expected and asked to do by their governments and how successful were they in prosecuting these goals This analysis postulates that it is against a democratic state s long term interests to rely on non government for profit mercenary military and security forces

The Oxford Companion to Classical Civilization Simon Hornblower, Antony Spawforth, Esther Eidinow, 2014-09-11 What did the ancient Greeks eat and drink What role did migration play Why was emperor Nero popular with the ordinary people but less so with the upper classes Why according to ancient authors was Oedipus with swollen foot so called For over 2 000 years the civilizations of ancient Greece and Rome have captivated our collective imagination and provided inspiration for so many aspects of our lives from culture literature drama cinema and television to society education and politics Many of the roots of the way life is lived in the West today can be traced to the ancient civilizations not only in politics law technology philosophy and science but also in social and family life language and art Beautiful illustrations clear and authoritative entries and a useful chronology and bibliography make this Companion the perfect guide for readers interested in learning more about the Graeco Roman world As well as providing sound information on all aspects of classical civilization such as history politics ethics morals law society religion mythology science and technology language literature art and scholarship the entries in the Companion reflect the changing interdisciplinary aspects of classical studies covering broad thematic subjects such as race nationalism gender ethics and

ecology confirming the impact classical civilizations have had on the modern world **The Tarragona Vortex** Lawrence J. McCrank, 2024-04-01 Roman Tarraco was the foundation for what came afterward at the same site in Late Antiquity and the Islamic and Latin Christian periods but it was an overlay on an Iberian habitation Cissis a coastal trading post with the Phocaeen Greek partner Kesse a Punic counterpart on the other side of the River Tulsis and above them all a refuge fort on the summit of Mt Tarrakon This history traces the amalgamation of these and their Romanization during the Punic Wars I III and Rome's conversion of Tarraco into an imperial provincial capital It was a complex of the main army base a vast war industry the government for the Hispania Citerior that became the Tarraconensis a port and trade center for the Western Mediterranean It grew in population to become a major city with sophistication imitating everything Roman The Hispanic Romans converted this outpost into a walled fortress and magnificent hillside municipality whose city state encompassed the Camp de Tarragona as its territorium Its upper tier was built into a terraformed tri level monumental complex consisting of the temple ceremonial square a new forum and a circus with an amphitheater below The hillside became its intramural residential district and old Cissis was overbuilt with a lower forum temple market and an entertainment area with a great theater baths gardens and the coastal shelf consisted of a warehouse row a manufacturing center fishing villages and an artificial port and waterworks for the Tulsis and harbor that demonstrated Roman advanced engineering just like the upper city showed off Roman architectural prowess and artistic tastes but also entertainment i e its love of racing and games bloodlust and violence and enjoyment of drama music and the brisque The province would have an extensive road system a proliferation of provincial towns wealthy villas and large scale farms The Tarraconensis was reduced in size during the reorganizations of the Empire and the Roman Ulterior or Baetica became more urbanized as its population became more dense The powerful northeastern capital followed the history of Rome and decline of the Empire with its interminable wars barbarian invasions weakened civic religion and economic problems leading to the Visigothic successor state in Late Antiquity Roman Tarraco was transformed into Tarracona but its monumental ruins and fabled history remained to be an inspiration to the medieval Restoration movement after the Islamic interlude These are the subjects of subsequent volumes in this series *Armed Forces Journal International* ,1864 *China Goes to Sea* Andrew S. Erickson, Lyle J Goldstein, Carnes Lord, 2009-07-01 In modern history China has been primarily a land power dominating smaller states along its massive continental flanks But China's turn toward the sea is now very much a reality as evident in its stunning rise in global shipbuilding markets its vast and expanding merchant marine the wide offshore reach of its energy and minerals exploration companies its growing fishing fleet and indeed its increasingly modern navy Yet for all these achievements there is still profound skepticism regarding China's potential as a genuine maritime power Beijing must still import the most vital subcomponents for its shipyards maritime governance remains severely bureaucratically challenged and the navy evinces at least as of yet little enthusiasm for significant blue water power projection capabilities This volume provides a truly

comprehensive assessment of prospects for China's maritime development by situating these important geostrategic phenomena within a larger world historical context China is hardly the only land power in history to attempt transformation by fostering sea power Many continental powers have elected or been impelled to transform themselves into significant maritime powers in order to safeguard their strategic position or advance their interests We examine cases of attempted transformation from the Persian Empire to the Soviet Union and determine the reasons for their success or failure Too many works on China view the nation in isolation Of course China's history and culture are to some extent exceptional but building intellectual fences actually hinders the effort to understand China's current development trajectory Without underestimating the enduring pull of China's past as it relates to threats to the country's internal stability and its landward borders this comparative study provides reason to believe that China has turned the corner on a genuine maritime transformation If that proves indeed to be the case it would be a remarkable if not singular event in the history of the last two millennia **The academy**, 1877 **The Oxford Classical Dictionary** Simon Hornblower, Antony Spawforth, Esther Eidinow, 2012-03-29 The revised third edition of the Oxford Classical Dictionary is the ultimate reference on the classical world containing over 6 200 entries The 2003 revision includes minor corrections and updates and all Latin and Greek words in the text are now translated into English The United States Army and Navy Journal and Gazette of the Regular and Volunteer Forces, 1865 **Art and Artists**, 1975 **Collier's ... Year Book Covering the Year ...**, 1966 Covers events of the previous year *Army, Navy, Air Force Journal & Register*, 1864 *Year Book Covering the Year ...*, 1966 The Compact Edition of the Oxford English Dictionary Sir James Augustus Henry Murray, 1971 Micrographic reproduction of the 13 volume Oxford English dictionary published in 1933 **Comparing Strategies of the 2nd Punic War** U.
