Advanced Quantitative Indexes in Cardiovascular Magnetic Resonance Imaging Xiaoyue Zhou, Rob J. Van Der Geest, Yucheng Chen, Peng Hu, Ming Yen Ng, 2024-08-28 In the past decades advanced quantitative indexes obtained by cardiovascular magnetic resonance imaging CMRI such as myocardial strain myocardial T1 ECV T2 T2 relaxation value myocardial blood flow quantification index and hemodynamics indexes have been proposed as an alternative for non invasive quantitative evaluation in various cardiovascular diseases Those quantitative indexes have been proven to be more sensitive in assessing the early change of myocardial tissue ventricular function or hemodynamics compared to the conventional qualitative methods However there are many challenges in the accurate measurement of those indexes as well as the evaluation of their clinical significance in the diagnosis and prognosis of a certain disease Besides quality control and standardization of those indexes become crucial when promoting them into clinical practice This Research Topic will offer comprehensive reviews and original research articles of the newly emerged quantitative CMRI methods and the clinical insights of the diagnostic and prognostic value of those advanced CMRI indexes CMRI techniques such as myocardial strain analysis quantitative myocardial tissue mapping 2 dimensional 4 dimensional flow quantification and quantitative perfusion will be of our interest The aim of this Research Topic will be to highlight the promising technical improvements in the accurate measurement of the CMRI indexes and or the added value of those indexes in disease diagnosis and prognosis

Meanwhile quality control and standardization of the advanced CMRI indexes in multi centre multi vendor research projects will be discussed

Philosophical Enactment and Bodily Cultivation in Early Daoism Thomas Michael, 2021-08-12 In *Philosophical Enactment and Bodily Cultivation in Early Daoism* Thomas Michael illuminates the formative early history of the Daodejing and the social political religious and philosophical trends that indelibly marked it This book centers on the matrix of the Daodejing that harbors a penetrating phenomenology of the Dao together with a rigorous system of bodily cultivation It traces the historical journey of the text from its earliest oral circulations to its later transcriptions seen in a growing collection of ancient Chinese excavated manuscripts It examines the ways in which Huang Lao thinkers from the Han Dynasty transformed the original phenomenology of the Daodejing into a metaphysics that reconfigured its original matrix and it explores the success of the Wei Jin Daoist Ge Hong in bringing the matrix back into its original alignment This book is an important contribution to cross cultural studies bringing contemporary Chinese scholarship on Daoism into direct conversation with Western scholarship on Daoism The book also concludes with a discussion of Martin Heidegger's recognition of the position and value of the Daodejing for the future of comparative philosophy

Novel Biomarkers for

Heart Disease Michael Lichtenauer, 2020-12-28 Cardiac biomarkers such as troponins and natriuretic peptides have made a great impact on clinical decision making as well as improving our understanding of molecular mechanisms of different disease conditions. However, the biomarkers that are currently in use do not reflect all the multiple disease pathways that are involved in a broad spectrum of cardiac disease conditions ranging from acute coronary syndrome to heart failure and heart failure with preserved ejection fraction (HFpEF) to pulmonary hypertension or arrhythmias. In this Special Issue, we will provide an overview of the current developments in the field of biomarker research, beginning with research on molecular pathways and cellular communication (e.g., microRNA) up to the clinical use of biomarkers. **Pennsylvania School Journal**, 1923 The Journal of Education, 1926
