The War Lawyers Craig Jones, 2020 Over the last 20 years the world s most advanced militaries have invited a small number of military legal professionals into the heart of their targeting operations spaces which had previously been exclusively for generals and commanders These professionals trained and hired to give legal advice on an array of military operations have become known as war lawyers The War Lawyers examines the laws of war as applied by military lawyers to aerial targeting operations carried out by the US military in Iraq and Afghanistan and the Israel military in Gaza Drawing on interviews with military lawyers and others this book explains why some lawyers became integrated in the chain of command whereby military targets are identified and attacked whether by manned aircraft drones and or ground forces and with what results This book shows just how important law and military lawyers have become in the conduct of contemporary warfare and how it is understood Jones argues that circulations of law and policy between the US and Israel have bolstered targeting practices considered legally questionable contending that the involvement of war lawyers in targeting operations enables legitimises and sometimes even extends military violence

The Changing Practices of International Law Tanja Aalberts, Thomas Gammeltoft-Hansen, 2018-04-05 With more than 158 000 treaties and some 125 judicial organisations international law has become an inescapable factor in world politics since the Second World War In recent years however international law has also been increasingly challenged as states are voicing concerns that it is producing unintended effects and accuse international courts of judicial activism This book provides an important corrective to existing theories of international law by focusing on how states respond to increased legalisation and rely on legal expertise to manoeuvre within and against international law Through a number of case studies covering a wide range of topical issues such as surveillance environmental regulation migration and foreign investments the book argues that the expansion and increased institutionalisation of international law itself have created the structural premise for this type of politics of international law More international law paradoxically increases states political room of manoeuvre in world society

McNall, 2015-12-07 Within and among nations rising levels of social inequality threaten our collective future Currently upwards of 80% of people s life chances are determined by factors over which they have absolutely no control Social inequality threatens the democratic project because it destroys the trust on which governments depend and it gives rise to corrupt political and economic institutions How can we get out of the traps we have created for ourselves We need to reboot capitalism Drawing on diverse examples from a range of countries McNall explains the social economic and ecological traps we have set for ourselves and develops a set of rules of resilience that are necessary conditions for the creation and maintenance of democratic societies and a set of rules essential for creating a sustainable future

China's Foreign Relations and the Survival of Autocracies Julia Bader, 2014-10-30 The Chinese government has frequently been criticized for propping up anti democratic governments This book investigates the rise of China as an emerging authoritarian power By comparing China s bilateral relations to three Asian developing countries Burma Cambodia and Mongolia it examines how China targets specific groups of actors in autocracies versus non autocracies It illustrates how the Chinese non interference policy translates into support for incumbent leaders in autocratic countries and how the Chinese government has thereby profited from exploiting secretive decision making in autocracies to realize its own external interests such as achieving access to natural resources In a statistical analysis of the patterns of Chinese external cooperation and their impact on the survival of autocratic leaders the book finds some evidence that China is more likely to target autocracies with economic cooperation However only some forms of bilateral interaction are found to increase the prospect of survival for autocratic leaders This important contribution to the understanding of both external factors of authoritarian endurance and China s foreign relations a field of study still lacking systematic investigation will be of great interest to students and researchers in Development Studies Asian Studies International Relations and International Political Economy

Bonvillian, Charles Weiss, 2015-08-18 The American economy faces two deep problems expanding innovation and raising the rate of quality job creation Both have roots in a neglected problem the resistance of Legacy economic sectors to innovation While the U S has focused its policies on breakthrough innovations to create new economic frontiers like information technology and biotechnology most of its economy is locked into Legacy sectors defended by technological economic political social paradigms that block competition from disruptive innovations that could challenge their models Americans like to build technology covered wagons and take them out west to open new innovation frontiers we don't head our wagons back east to bring innovation to our Legacy sectors By failing to do so the economy misses a major opportunity for innovation which is the bedrock of U S competitiveness and its standard of living Technological Innovation in Legacy Sectors uses a new unifying conceptual framework to identify the shared features underlying structural obstacles to innovation in major Legacy sectors energy air and auto transport the electric power grid buildings manufacturing agriculture health care delivery and higher education and develops approaches to understand and transform them It finds both strengths and obstacles to innovation in the national innovation environments a new concept that combines the innovation system and the broader innovation context for a group of Asian and European economies Manufacturing is a major Legacy sector that presents a particular challenge because it is a critical stage in the innovation process By increasingly offshoring production the U S is losing important parts of its innovation capacity Innovate here produce here where the U S took all the gains of its strong innovation system at every stage is being replaced by innovate here produce there which threatens to lead to produce there innovate there To bring innovation to Legacy sectors authors William Bonvillian and Charles Weiss recommend that policymakers focus on all stages of innovation from research through implementation They should fill institutional gaps in the innovation system and take measures to address structural obstacles to needed disruptive innovations In the specific case of advanced manufacturing the production ecosystem can be recreated to reverse jobless innovation and add manufacturing led innovation to the U S's still strong research oriented innovation system *Handbook of Research on Global Fashion Management and Merchandising* Vecchi, Alessandra, 2016-05-03 Innovation and novel leadership strategies have aided the successful growth of the fashion industry around the globe However as the dynamics of the industry are constantly changing a deficit can emerge in the overall comprehension of industry strategies and practices The Handbook of Research on Global Fashion Management and Merchandising explores the various facets of effective management procedures within the fashion industry Featuring research on entrepreneurship operations management marketing business modeling and fashion technology this publication is an extensive reference source for practitioners academics researchers and students interested in the dynamics of the fashion industry [The Drone Memos](#) Jameel Jaffer, 2010-01-12 A trenchant summation and analysis of the legal rationales behind the US drone policy of targeted killing of suspected terrorists including US citizens Publishers

Weekly starred review In the long response to 9 11 the US government initiated a deeply controversial policy of targeted killing the extrajudicial execution of suspected terrorists and militants typically via drones A remarkable effort was made to legitimize this practice one that most human rights experts agree is illegal and that the United States has historically condemned In The Drone Memos civil rights lawyer Jameel Jaffer presents and assesses the legal memos and policy documents that enabled the Obama administration to put this program into action In a lucid and provocative introduction Jaffer who led the ACLU legal team that secured the release of many of the documents evaluates the drone memos in light of domestic and international law He connects the documents legal abstractions to the real world violence they allow and makes the case that we are trading core principles of democracy and human rights for the illusion of security A careful study of a secretive counterterrorism infrastructure capable of sustaining endless orderless war this book is profoundly necessary Katrina vanden Heuvel editor and publisher of The Nation

China and Its Small Neighbors Sung Chull Kim,2023-03-01 In China and Its Small Neighbors Sung Chull Kim examines the political implications of the economic asymmetry between China and its small neighbors part of wider changes in international relations brought about by the rise of China While being critical of the current trend that focuses on the China U S rivalry alone Kim argues that a microanalysis of China s advances toward its neighbors is a guide to understanding the trajectory of China s expanding influence and transitions in world politics more broadly Economic asymmetry as seen in trade concentration non transparency and reliance on bilateral aid has made China s small neighbors vulnerable on the political front thus generating potential threats to their sovereignty and independence Because China has the upper hand in the bilateral relationships these weak states practice dual core hedging as a strategy for survival They hedge on China for expected economic benefits and at the same time hedge against their powerful neighbor to mitigate the risks involved in that hedging on Each small state s mode of hedging depends on its degree of vulnerability and its availability of policy instruments such as multilateral institutions and bilateral partnerships with extra regional powers

urban planning is a crucial and emerging topic Urban planners alongside the local and regional authorities that have traditionally been less engaged in food related issues are now asked to take a central and active part in understanding how food is produced processed packaged transported marketed consumed disposed of and recycled in our cities While there is a growing body of literature on the topic the issue of planning cities in such a way they will increase food security and nutrition not only for the affluent sections of society but primarily for the poor is much less discussed and much less informed by practices This volume a collaboration between the Bartlett Development Planning Unit at UCL and the Food Agricultural Organisation aims to fill this gap by putting more than 20 city based experiences in perspective including studies from Toronto New York City Portland and Providence in North America Milan in Europe and Cape Town in Africa Belo Horizonte and Lima in South America and in Asia Bangkok and Tokyo By studying and comparing cities of different sizes from both the Global North and South in developed and developing regions the contributors collectively argue for the importance and circulation of global knowledge rooted in local food planning practices programmes and policies
