Virtual Geographies Sabine Heuser,2016-08-09 Virtual Geographies is the first detailed study to offer a working definition of cyberpunk within the postmodern force field Cyberpunk emerges as a new generic cluster within science fiction one that has spawned many offspring in such domains as film music and feminism Its central features are its adherence to a version of virtual space and a deconstructivist punk attitude towards high culture modernity the human body and technology from computers to prosthetics The main proponents of cyberpunk are analyzed in depth along with the virtual landscapes they have created William Gibson s Cyberspace Pat Cadigan s Mindscapes and Neal Stephenson s Metaverse Virtual reality is examined closely in all its aspects from the characteristic narrative constructions employed to the esthetic implications of the virtual sublime and its postmodern potential as a discursive mode With its interdisciplinary approach Virtual Geographies opens up fresh perspectives for scholars interested in the interaction between popular culture and mainstream literature At the same time the science fiction fan will be taken beyond the conventional boundaries of the genre into such revitalizing domains as postmodern architecture and literature and into cutting edge aspects of science and social thought

Geotechnical Practice for Waste Disposal D.E. Daniel,2012-12-06 Earth scientists and geotechnical engineers are increasingly challenged to solve environmental problems related to waste disposal facilities and cleanup of contaminated sites The effort has given rise to a new discipline of specialists in the field of environmental geotechnology To be effective environmental geotechnologists must not only be armed with the traditional knowledge of fields such as geology and civil engineering but also be knowledgeable of principles of hydrogeology chemistry and biological processes In addition the environmental geotechnologist must be completely up to date on the often complex cadre of local and national regulations must comprehend the often complex legal issues and sometimes mind boggling financial implications of a project and must be able to communicate effectively with a host of other technical specialists regulatory officials attorneys local land owners journalists and others The field of environmental geotechnology will no doubt continue to offer unique challenges The purpose of this book is to summarize the current state of practice in the field of environmental geotechnology Part One covers broadly applicable principles such as hydrogeology geochemistry and contaminant transport in soil and rock Part Two describes in detail the underlying principles for design and construction of new waste disposal facilities Part Three covers techniques for site remediation Finally Part Four addresses the methodologies for monitoring The topics of waste disposal and site remediation are extra ordinarily broad

What Images Do Jan Backlund,Henrik Oxvig,Michael Renner,Martin Soberg,2019-09-13 When images look like something they do so because they are different from what they resemble This difference is not sufficiently captured by the traditional theories of representation and mimesis and yet it is the condition for

any such theory Various contemporary image theorists have pointed out that Plato already understood that images are not what they look like Images have their own existence which cannot be identified with a concept but should be examined in terms of actions This book comprises fifteen articles that investigate what images do particularly in relation to the disciplines of architecture design and visual arts It claims that it is the differentiating power of images their actions which constitutes their capacity to look like something they are not as well as create something that does not yet exist What Images Do addresses the crucial role that images might play in producing and investigating what we have not yet seen or understood in and of reality

Qualitative Research in Education: A User's Guide Marilyn Lichtman,2013 This textbook provides readers with a blend of practical and theoretical information using real world examples and illustrations to help users grasp abstract ideas and apply them to their research **Handbook of Batch Process Design** P.N. Sharratt,2012-12-06 Batch processes are used to manufacture many fine organic chemicals and as such they can be considered to underpin much of the modern chemical industry Despite widespread use and a consequent huge contribution to wealth creation batch processes have attracted limited attention outside the user industries Batch chemicals processing uses a number of core techniques and technologies such as scheduling and sequence control agitation and batch filtration The combination of these technologies with often complex chemistry the multi purpose nature of much of this type of plant the distinctive safety and environmental issues and a fast moving commercial environment makes the development of a successful batch process a considerable challenge for the chemist or engineer The literature on the topics covered in this book is fragmented and often not easily accessible so this handbook has been written to address this problem and to bring together design and process analysis methods in the core areas of batch process design By combining the science and pragmatism required in the development of successful batch processes this new book provides answers to real problems in an accessible and concise way Written by an international team of authors drawn from industry consulting and academia this book is an essential part of the library of any chemist

technologist or engineer working on the development of new or existing batch processes Naked Lunch @ 50 Oliver C. G. Harris, Ian MacFadyen, 2009 Celebrating and analyzing a landmark novel that is aberrant obscene and blasphemous Naked Lunch was banned ridiculed and castigated on publication in 1959 and yet fifty years down the line it has lost nothing of its power to astonish and inspire A lacerating satire an exorcism of demons a grotesque cabinet of horrors and a landmark experiment in linguistic derangement it is a work of ecstatic excoriating laughter and great transcendent beauty The first book ever to take on William Burroughs masterpiece this critical collection brings together an international array of writers scholars musicians scientists and artists who cast new eyes on the writing and reception of Burroughs unique work Tracing its origins from Texas to Tangier from Mexico City to New York and Paris crossing time zones and cultures Naked Lunch 50 breaks new ground in understanding this most influential but elusive of texts Naked Lunch 50 includes studies of the text s manuscript and textual history of its origins in and creative debts to a range of specific locations of its reception in different societies over time and in relation to broader cultural artistic and personal histories Contributors discuss the novel s existence as a physical object in regard to both design and collectability the history of its critical reception its cultural importance in relation to censorship and visionary art its relationship to literary genres from science fiction to the horror film and its significance as a work prophetic of current trends in electronic culture and biology A series of introductory sections or Dossiers written by Ian MacFadyen provide glimpses of further horizons of research and reading while a set of endpapers by the artist Philip Taaffe offers a visual correlative to Burroughs extraordinary text *Listening in Action* Rebecca M Rinsema, 2016-10-14 In an age when students come to class with more varied music listening preferences and experiences than ever before music educators can find themselves at a loss for how to connect with their students Listening in Action provides the beginnings of a solution to this problem by characterizing students contemporary music listening experiences as they are mediated by digital technologies Several components of contemporary music listening experiences are described including the relationship between music listening experiences and listener engagements with other activities listener agency in creating playlists and listening experiences as a whole and the development of adolescent identities as related to the agency afforded by music listening devices The book provides an accessible introduction to scholarship on music listening across the disciplines of musicology ethnomusicology sociology of music psychology of music and music education By reading Listening in Action music educators can gain an understanding of recent theories of music listening in everyday life and how those theories might be applied to bridge the gap between music pedagogies and students who encounter music in a heavily mediated postperformance world Handbook of Life Course Health Development Neal Halfon, Christopher B.
