Media Authorship Cynthia Chris, David A. Gerstner, 2013-02-15 Contemporary media authorship is frequently collaborative participatory non site specific or quite simply goes unrecognized In this volume media and film scholars explore the theoretical debates around authorship intention and identity within the rapidly transforming and globalized culture industry of new media Defining media broadly across a range of creative artifacts and production cultures from visual arts to videogames from textiles to television contributors consider authoring practices of artists designers do it yourselfers media professionals scholars and others Specifically they ask What constitutes media and authorship in a technologically converged globally conglomerated multiplatform environment for the production and distribution of content What can we learn from cinematic and literary models of authorship and critiques of those models with regard to authorship not only in television and recorded music but also interactive media such as videogames and the Internet How do we conceive of authorship through practices in which users generate content collaboratively or via appropriation What institutional prerogatives and legal debates around intellectual property rights fair use and copyright bear on concepts of authorship in new media By addressing these issues Media Authorship demonstrates that the concept of authorship as formulated in literary and film studies is reinvigorated contested remade even reauthored by new practices in the digital media environment

The Handbook of Interior Design Jo Ann Asher Thompson, Nancy Blossom, 2015-02-09 THE HANDBOOK OF INTERIOR DESIGN The Handbook of Interior Design offers a compilation of current works that inform the discipline of interior design These examples of design scholarship present a detailed overview of current research and critical thinking The volume brings together a broad range of essays

from an international group of scholars who represent the diversity of work in the field. Intended to engage those involved in the study and practice of interior design, the Handbook considers the connections between theory, research, and practice that shape the field of interior design as well as the theoretical perspectives that inform the field. It contains over thirty essays which together demonstrate the wide range of opinions and knowledge in the discipline, grouped in sections to reflect key components of their content. A close reading of the essays will uncover contradictory as well as supporting positions on aspects of interior design, challenging the reader to think critically and develop a personal stance toward the subject. **3D**

Geo-Information Sciences Jiyeong Lee, Siyka Zlatanova, 2008-10-24 In recent years, 3D geo information has become an important research area due to the increased complexity of tasks in many geo scientific applications such as sustainable urban planning and development, civil engineering risk and disaster management, and environmental monitoring. Moreover, a paradigm of cross application merging and integrating of 3D data is observed. The problems and challenges facing today's 3D software generally application oriented focus almost exclusively on 3D data transportability issues: the ability to use data originally developed in one modelling/visualisation system in other and vice versa. Tools for elaborated 3D analysis, simulation, and prediction are either missing or when available, dedicated to specific tasks. In order to respond to this increased demand, a new type of system has to be developed. A fully developed 3D geo information system should be able to manage 3D geometry and topology, to integrate 3D geometry and thematic information to analyze both spatial and topological relationships, and to present the data in a suitable form. In addition to the simple geometry types like point, line, and polygon, a large variety of parametric representations, freeform curves and surfaces or sweep shapes have to be supported. Approaches for seamless conversion between 3D raster and 3D vector representations should be available; they should allow analysis of a representation most suitable for a specific application. **Introduction to Engineering** Quamrul H. Mazumder, 2018-09-03

Developed for the Ultimate Introductory Engineering Course, *Introduction to Engineering: An Assessment and Problem Solving Approach* incorporates experiential and problem and activity based instruction to engage students and empower them in their own learning. This book compiles the requirements of ABET, the organization that accredits most US engineering, computer science, and technology programs, and equivalency evaluations to international engineering programs, and integrates the educational practices of the Association of American Colleges and Universities (AACU). The book provides learning objectives aligned with ABET learning outcomes and AACU high impact educational practices. It also identifies methods for overcoming institutional barriers and challenges to implementing assessment initiatives. The book begins with an overview of the assessment theory, presents examples of real world applications, and includes key assessment resources throughout. In addition, the book covers six basic themes: Use of assessment to improve student learning and educational programs at both undergraduate and graduate levels; Understanding and applying ABET criteria to accomplish differing program and institutional missions; Illustration of evaluation/assessment activities that can assist faculty in improving

undergraduate and graduate courses and programs Description of tools and methods that have been demonstrated to improve the quality of degree programs and maintain accreditation Using high impact educational practices to maximize student learning Identification of methods for overcoming institutional barriers and challenges to implementing assessment initiative A practical guide to the field of engineering and engineering technology Introduction to Engineering An Assessment and Problem Solving Approach serves as an aid to both instructor and student in developing competencies and skills required by ABET and AAC U

The Passivhaus Handbook Janet Cotterell,Adam Dadeby,2012-11-30 As we move towards the 2016 zero carbon target in house building Passivhaus construction looks like becoming not just popular in the UK but commonplace This is a no nonsense and engaging introduction on how to do it KEVIN MCCLOUD The Passivhaus Handbook is an essential guide for anyone wanting to realise a supremely comfortable healthy and durable home with exceptionally low energy costs Passivhaus design focuses on getting the building fabric right to achieve ultra low energy consumption cost effectively The approach is relevant to a wide range of building types and climates Its methodology can be combined with elements of other building standards such as the UK s Code for Sustainable Homes CSH or with other sustainable building goals such as a commitment to using low impact or natural building materials Whether you are building an extension retrofitting your house or starting from scratch and whether you are new to low energy design or already have some experience this book will help you navigate around the potential pitfalls and misconceptions It brings together current thinking and best practice The book includes a clear explanation of the underlying building physics and terminology as well as detailed information on key elements of Passivhaus avoiding air leakage designing thermal cold bridges moisture management and ventilation strategy There is also lots of practical advice on setting up a project including developing a motivated project team and a discussion of economic considerations and the policy context in the UK As pressure on global resources increases and energy prices continue to rise the Passivhaus approach proven over 20 years meets the challenge of ultra low energy building for the future

Representing, Modeling, and Visualizing the Natural Environment Nick Mount,Gemma Harvey,Paul Aplin,Gary Priestnall,2008-12-22 The explosion of public interest in the natural environment can to a large extent be attributed to greater public awareness of the impacts of global warming and climate change This has led to increased research interest and funding directed at studies of issues affecting sensitive natural environments Not surprisingly much of this work has re
